Thread: [Girl fansigns, holding paper Pack #1](#)

dye. - July 15, 2014, 1:23 pm

This pack contains girls, nude & non nude holding up pieces of paper with names on them, you can use photoshop or another program to remove the text on the paper and write your own, therefore making it look like a real fansign, i.e. if the victim asks you to write their name on paper showing face blah blah.

All replies to this thread showing your appreciation is appreciated from my end, thank you & good luck E-Whoring.

Thanks bad.

You are the best man!

Btw, which program (Not photoshop) to use so you can make a perfect modification on the pictures?

There's a site called BeFunky, simply upload the picture and use the clone tool, you can clone the clear pieces of paper to cover the whole thing.

You could try GIMP. It's simpler than Photoshop when you learn the basics.

OT: Thanks for sharing this OP!

There is a much better way to make these without the use of font. (:

More realistic too.
