really ? i dont know i hear this first time :S
anyway ty mate
what diffrent with " Silver Light Driveby "
!?

Java drive bys are considered "outdated" to people who do not understand.
They still work on older versions of Java which by default most computers will not have unless installing recently.

Java drive bys function up to Java Version 7 Update 45 and lower.
I am currently workin on an exploit I have discovered to make this work for all versions.

Ok sir, ty for infos.
now i know all i been away from hf 1,5years now i hear a lot news.

Yeah, to the people saying that their outdated, they only are if the person updated their Java to the latest version. Not everyone does. Worth a shot though.
