Thread: [IM3, is it HWID locked?](#)

Evanescence - July 15, 2014, 11:28 pm

I'm going to get IM3 as soon as I get \$25 but I have a question, is HWID locked, I have 2 computers and I would like to have it on both.

It is HWID locked, you'd have to ask Shockwave what the computer limit is (Netseal has it changeable)

Evanescence - July 15, 2014, 11:44 pm

Ok thanks, I'll PM him now and ask what the limit is

Well it's still some information somebody might search for and find here.

No problem, just making sure you guys know ?

You already got your answer, but a point of note, to avoid everyone getting all locked out when Shock goes on vacation the HWIDs reset daily or some shit he mentioned to me.

But yea 1 machine (controller) per license in general.
