These aren't actually my servers. I found this link via twitter.

I have played on my server with a couple of friends and it seemed to be alright.

Got it! Thanks JB!

For those who are wondering, the server is not crappy but it's actually decent. I don't experience lag, and ping from my place it at 300. I haven't tested the plugins and other jars but I'll try them out soon.

Thanks again, OP!

Minecraft server hosting is a pain in the ass...

Kinda hard to find good, reliable hosting company for minecraft

I will be more than glad to test (even better it's free ;))
