Impossible, doesn't isn't, couldn't happen.

Only way it could happen - Someone has the XBL DB and made it into a lookup tool.
Use Cain and Abel if you want to find IP addresses via Xbox.

It's not impossible. Nothing is impossible, what just don't know how to do it. I'm sure people thought the same about being able to resolve skype IPs. Until the skype resolvers came out.

Well since Skype comes on the Xbox One, I don't know, you could add them on Xbox and say you'd like to play over Skype or something, since you can snap Skype while playing. Then once you get their username use a Skype resolver to get there IP.

^ What the guy above me said, just invite the kid to a skype chat and get his IP.
