Hlias and I are proud to present Advanced License System. It's an advanced tool you need to manage your application's licenses. It's coded in VB.NET by Hlias. The system works with online databases, so no need to worry about that. With little work you can add the system to your VB.NET applications. That way, you can manage your product and remove scammers if they scam you. If you purchase the system, you will get support with Team Viewer, Windows Live Messenger, or Skype from Hlias and I.

Look at the other thread, and ask h3llboy, where it is ... I think its on his desktop, or some thing ?

On Topic: Lets see how this new thread goes, GOOD LUCK :)

Well never heard that, and once there's proof, there's proof. Until then, there's not and you're wrong.
