Thread: [Need Beta Testers | Multi-OS HTTP Keylogger](#)

Aura 2.0 - July 18, 2014, 8:34 am

Hello, I am going to be coming out with a Multi-OS Http Keylogger but need some testers. Note, you wont just be testing out the keylogger but also other stuff.

OS I can Test On (32bit/64bit):
Bots I have:

Please POST with that information. It's not a must that you have bots but it'll help. If anyone is kind enough to help us out, please post here. Everything will be via TV and you can use a VM.

MirrorDude - July 18, 2014, 7:25 pm

OS I can Test On (32bit/64bit): Win7 64 and 32bit
Bots I have: None

sharkLogger is a pretty shitty name, though...

Aura 2.0 - July 21, 2014, 12:08 pm

Anyone else? I need people who can help with testing on Linux and Mac.

Light Yagami - July 22, 2014, 8:18 am

I am on linux, PM me more info and what you need of me.

Jokeh - July 22, 2014, 8:19 am

PM Me more info please I may be able to help you out!

McAwesome - July 22, 2014, 8:49 am

If you need my help pm me, I can help you testing it

Why not just setup some virtual machines?

OpenSourcerer - July 24, 2014, 10:39 pm

I can test on 64 bit windows 7 and also kubuntu 64 bit and kali, i can also use vms if you need more.

I have no bots :/
