Big boss repo has been completely hacked. Their database was compromised.

All tweaks and packages have gone free lol.

Not on the maintained one, but a separate repo.

Not going to share it you obviously. That'd be against HF rules.

Search up Kim Jong cracks tho.

I was cracking up when I saw the site lol. It's all a troll on the Saurik Competition vs Community. All that iMods vs Cydia bullshit. Honestly I just feel bad to all the devs whose work just became free...all of it. Hopefully some have a DRM in place within their apps.

Yea. It's bad, but nothing serious. Other repositories have been doing the same for years.

Damn, I wish that I still used my jailbroken phone, I'd like to see if any of that works right now.

Alpha Bruh - July 19, 2014, 11:05 am

I mean it's not like you couldn't get any of the files free to begin with, seems like a waste of time to me.

On?x - July 19, 2014, 11:59 am

Obviously take caution as they could have been malicious with this. Still, it seems like they are trying to kinda throw blame on to the iMods team to create conflict.

Døn - July 20, 2014, 12:16 am

Saurik confirmed there was nothing malicious with BigBoss. So download away.

This is actually pretty impressive haha.

No. Just buy the theme you want. Why steal from someone who worked so hard to make it?

I have 0 bugs since the last update.

I get an updated a few times a month!Shit.. I really shouldn't forum when I'm half asleep.. I thought you wrote OSE, sorry ?

Døn - July 21, 2014, 1:07 am

ISX is on DRM heaven. Intellborn stepped up their game with their shite lol

It crashes my phone four five times a day. What do you mean no bugs?

Fuck ISX7. I have it, but...

No.

Slide crashes all the time on me.
