(Jul 20, 2014 02:18 AM)Wire™ Wrote: [\[CITE\]](#) I've received a vouch copy of this. Here is my review. Great tool overall. There are some minor bugs, but I believe those will be sorted out soon. 1-2 commands don't work, but that's due to a database being down. As I said, there are a few minor bugs, but most commands are functional, and the ones that work, work amazingly. And it's one of the best values you're ever going to find on hackforums. Even if you got half of the commands for 20-25, still a great deal. Especially with the account generators, and the stresser. My rating.. 8.5/10 (Jul 20, 2014 02:50 AM)Rapierz Wrote: [\[CITE\]](#) Got a vouch copy of this bot. I have tested some features including the account generator. They are working and the speed of this bot is simply amazing!

Vouch for this user, this skype bot and my money.

He might be non-upgraded, but you shouldn't judge the book by it's cover.

AMIIRITE.

I'll take a vouch copy. I'm a friend of RedSpyGentleman.

Oliver Sykes - July 19, 2014, 5:38 pm

I'll take a vouch copy. Your choice though, as I am relatively low on rep and post count, I'd understand if you rejected.

Evanescent - July 19, 2014, 5:46 pm

I would be happy to take a vouch copy, if you left with it still.

Received a VOUCH copy and works good, good to go for cheap rates, don't expect much for less money.

Booter is working for small networks and home connections, proxies are public ones and some little bugs with commands, OP'll fix it soon.
