Thread: [NyaaStream.com | High Quality & Fast Loading Anime Streaming | Maintained By AA](#)

Tasemu - July 20, 2014, 12:15 am

UPDATE:

Ok guys here is the deal, we are going to be moving over to a new method of hosting our anime. The reason for this is because we can buy an extra TB fairly easily but once that is used up then its GG. This new way has no quality or speed loss from what I have seen. I'm very impressed with it. Also no size for uploading anime so if people out there have been wanting to add an older series to the site, now they are more than welcome to.

Contributors are going to be shown the ropes asap so we can get back to uploading for you guys.

ONE IMPORTANT THING!: These new hosts are chucking up an ad on the player that you have to close before watching the video. THESE AD's are NOT ours. If you have adblock+ chrome extension or something similar you wont see any adverts. If you dont like the ads just install damn adblock until we figure out a way around it.

Hey guys, so for a while now I have been messing around with the idea of uploading some anime from this season for people on AA who enjoy watching streams. It has also always pissed me off how many streaming sites have horrible quality or slow loading videos. So I have casually been researching around here and there to see if I cant come up with a solution to these problems and I am happy to say I think we have.

NyaaStream is a website that members of this section are maintaining with the aim of providing Anime Adventures with high quality and fast loading streaming options for their anime.

We are mainly going to focus on series starting from this season (summer) and each contributor will be maintaining 1-2 series for you to watch. If you are interested in joining the group then feel free to PM me but BE WARNED I am not interested in taking on quitters who will drop a series halfway through. You will only need to upload one episode per week which is not that hard.

Anyway for those of you who have read this far then here is the link. We already have a few series up there ready to watch.

Got a suggestion you want to share? sure go for it, just post it here and we will see. Have you noticed one of your series is falling behind? Then go to the contributors page and bitch at the person maintaining it. >:3

your should definitely build this up to be the official streaming site that hf uses for anime.

edit:
ALSO

yey 1st

Tasemu - July 20, 2014, 12:21 am

Your picture is dead lol.

Ryner - July 20, 2014, 12:22 am

This seems like a website which has quite a lot of potential, and could be used as the Official Streaming site that HF users can use whilst watching Anime!

I really look forward to how it will turn out and I would love to contribute and help you guys out with this! I promise to not quit half-way or such, I have time! :)

Erwin Schrödinger - July 20, 2014, 12:24 am

If I decide to actively watch anime, I think I'll start here. :)

+Cloud - July 20, 2014, 12:28 am

Will old series be uploaded to the site?

We aren't planning on backlogging old series. There are way too many and also shit-tons of other sites for old shit. ^^

+Cloud - July 20, 2014, 12:33 am

psh

you should possibly make a system where you have to maybe seed/upload to watch anime kinda like animebytes but stream aswell :0 and torrents :0

Nooo, people won't be able to watch Shiina there ;,;

+Cloud - July 20, 2014, 2:38 am

Now I don't know if he wants to keep the site locked down to just AA users or wants to expand it to non-HF traffic, but making exclusive would be cool, so people wouldn't just leech off of it. But at the same time, all the competition isn't locked down so some people may look elsewhere.

Making a forum there would be cool, because at least we could easily transition from streaming to discussion.

Tasemu - July 20, 2014, 3:02 am

I dont plan on adding a forum. AA is the only forum for me. Chatbox maybe, with the new design.

Ryner will be taking on 2 series to help us out by the way. Cheers man!

At least it reduces the maintenance of the site. Chatbox sounds OK, but having a thread here in discussion at least keeps everyone in the know of whats being discussed.

I am also happy to be of any help! Sorry that I dozed off during the Skype Conversation I haven't slept that much tonight xD.

I will be maintaining the following Animes:Sword Art Online II
Aldnoah.Zero Hopefully everything will go well! ^^

SavageBoys - July 20, 2014, 5:40 am

I'm guessing since the site is all about streaming you only want the latest series uploaded as they come out?

How is quality managed? (Are 1080p uploads your baseline?)

Tasemu - July 20, 2014, 6:35 am

720p is the baseline. We may consider 1080 when I want to fork out more money for the storage.

PS

Sword Art Online II & Aldnoa.Zero are ready to go!

Yup, Ryner has joined the team and has decided to take care of Sword Art Online II and Aldnoah.Zero, So whether your into crappy mmo anime or awesome mecha goodness, you can watch them each week here now. Good stuff.

An idea, a button with "next episode" below each video.

Spyware - July 20, 2014, 2:11 pm

Honest question, why dont you have the newest SaO? Also are you ripping these or just grabbing Horrible subs and uploading? Ripping from CR is easy if you know how lol.

I also see you are using Youtube to host these, yep sounds like a solid idea, oh wait, I am fairly sure youtube is know for taking down things such as this. Might want to look into personally hosting the streams for your members as you dont have to deal with videos dieing all the time. Also the question becomes what makes you better than say Animecrazy.net ? They are doing what you are doing just looks different.

horriblesubs rips from crunchyroll tho but I have to say the site is slow when it comes to uploading, SAO2 episode 3 aired 2 days ago and its still not up its also missing key features.

They should write a scraper like I did for my website <http://masterani.me/>

In my opinion when I ran a video on the site was very fast and smooth, no buffering and hardly any waiting time, much faster than Animecrazy.net. I'm not sure where they get the episodes from, but whatever their doing is what almost every streaming site does as well. It's a new site so they still need to work on staff responsibility and such but soon everything will be running smoothly and all episodes will be updated.

This is a really dumb thing to say.

How about this. Then the question becomes what makes Animecrazy better than say any other streaming site that came before it?

That question would go on forever.

Tas is offering the site as a service for people who want to view current anime, not older. He is not using YouTube directly.

That sounds like 200% better than what I saw it as, also I ask how they are pulling vids because waiting for it to hit Horriblesubs downloading then upload is far longer than just ripping it from CR.

Tas is offering the site as a service for people who want to view current anime, not older. He is not using YouTube directly. Also it is not a dumb thing to say, at this point there are thousands of sites doing what animecrazy does. I just chose that site off the top of my head, 5 min on google I could find a different one.

It is like opening a new Search site cough*bing*cough and fighting with a well established site, aka google. Not what I would call the brightest idea. So I wanted to know what this new site brings to the table that older sites that have been around for years currently dont but you do.

When I checked out the site, I did not dig but I seen the youtube player and figured they were just another site uploading to a site like Youtube/veoh/putstreamingsitehere thus my question is what makes you different from the other sites who already do that. if you are hosting it I can see that has a major advantage over them as you dont have to stress about video take downs, just have to worry about that CND letter that may come.

Except for the fact that their site is specifically created for AA users, ran by AA users, and has a specific audience it caters too.

If it is just for AA members, Why not just make a forum topic with links to the server? Why build a front end that others outside of AA could find? I know I am sounding like a dick, but when you only hear praise than actively looking at how to find issues or better the site is over looked. So be mad at me all you want I will nit pick your site as that's the only way to get true criticism of what you are building.

I like the concept, love that you are hosting it. Still trying to figure out what makes you better than say CR (Other than waiting 1 week for a ep)

Because even if they didn't have a front end so to speak they would need somewhere to host it. Why not create a front end so users can have a graphically pleasing experience.

No one is mad at you (least I'm not), you are just saying something that really doesn't matter.

You keep saying what makes them better than A or B. The thing is, they aren't trying to be. CR is

massive and really targets a wide general audience. Tas isn't trying to compete with them or any other large streaming site. I think he is more so just offering a small service for AA and those who wish to use it for what it is.

Tasemu - July 20, 2014, 3:20 pm

@subRand0m: Yeah pretty much what everyone else is saying. We aren't hosting on youtube, also we aren't waiting for HS, nor are we ripping from CR. Tasemu - July 24, 2014, 3:29 pm

Yeah, quick fix when i woke up. I have no idea why mysql crashed. Maybe someone is playing silly buggers.

Found out the reason mysql is crashing, though I wont be able to fix it until I get home and have access through ssh. May also be wasted because its a friday. Wish me luck.

Until then the mysql may go down again. I'm not too sure.

Basically what this application is going to do is it would be a small desktop application for watching your favorite anime. Not only that, but I plan to integrate the MyAnimeList API onto it and have it automatically update your list. Though this is just a small draft of the application, it is subject to change to make things work (the key feature is just updating your MAL so that won't change at all).

This will be open sourced and the git is found on <https://github.com/senahf/NyaaTracker> (There is absolutely nothing there atm as I'm still working on the planning).

What exactly does that do? You didnt really explain it well.

So it's safe to say it's not hosted on youtube, but just a slightly custom version of it.

No, Nyaa isn't going to become another Crunchyroll. Thats nearly impossible. Crunchyroll is pretty much the only legal way to watch the latest anime online via streaming. They pay a whole lot of licensing fees, and have contracts with the original anime Networks to stream it.

Unless the Nyaa guys have a few dozen million dollars laying around. Thats not likely.

I do believe multiple contributors have suggested something like this before though. But it ended up not happening, I am unsure. If you want a reliable answer concerning this you'd be better off asking Tasemu.

Eh, dont really need a answer, was just kind of a suggestion and if its already been suggested, i guess he cba code it and upload it himself (manually or not, i dont know).

Its pretty much a rip-off gyazo and I have seen it on another anime streaming site that was in beta but then the project dropped.

Now that you mention it a "night mode" switch would be a nice addition.

I'll probably make a userscript that does this for now lol.

Though personally i do not stream and prefer to download, if I sometime cba to download a series then I'll watch it on Nyaa for sure (for example barakamon) :)

I know this will probably get shot down but.. reviewers? A synopsis is nice and all but 9/10 its something from a wiki and while accurate usually falls short of actually describing the series in a way other anime watchers can understand clearly.

Would be nice if said reviewers could link anime they felt were in a similar vein for users to check out.

I just felt that atm the page with the synopsis is a bit bare and something like this would be nice.

Of course, that's the goal of Nyaastream. For people to watch sum anime.

In?sane? - August 9, 2014, 9:17 am

Awesome work there mate. Another thing that would be nice to see is MAL/anichart integration (if that is even possible) for rankings, reviews, information and statistics since the main page of the anime you go to is very empty. Plus having a HTML5 player so we can watch on Tables/Phones would be amazing, other than that i like the simplicity of the site and will use it for the new animes im following.

SavageBoys - August 9, 2014, 10:18 am

(I tried yesterday but I may have done something wrong whilst uploading, I do believe Aldnoah.Zero was uploaded successfully though yet it wasn't added unto the website. xD)

NexPB - August 10, 2014, 10:06 am

btw @Tesamu you should set the embed video width to 100% so it scales well

Tasemu - August 11, 2014, 10:44 pm

Going through some technical adjustments right now. Staff members make sure to check the staff lounge chat to see whats been happening. Everyone else, there could be some delays but hopefully this shouldn't take too long.

UPDATE:

Ok guys here is the deal, we are going to be moving over to a new method of hosting our anime. The reason for this is because we can buy an extra TB fairly easily but once that is used up then its GG. This new way has no quality or speed loss from what I have seen. I'm very impressed with it. Also no size for uploading anime so if people out there have been wanting to add an older series to the site, now they are more than welcome to.

Contributors are going to be shown the ropes asap so we can get back to uploading for you guys.

ONE IMPORTANT THING!: These new hosts are chucking up an ad on the player that you have to close before watching the video. THESE AD's are NOT ours. If you have adblock+ chrome extension or something similar you wont see any adverts. If you dont like the ads just install damn adblock until we figure out a way around it.

Yeah im sure other sites are using this method. But ill say again just for you, we aren't competing with any other site. In fact, this site isnt even for the viewers.

Its for the contributors to have fun building something. you guys just get to watch what we upload as a side effect. I still love you all, but dont feel that we are doing this for the 'viewers' lol. ^^

Our site is so special we tipped the scope upside down, a crazy world where our viewers can join us and have fun contributing, watch our streams if they like, or deal with it. :3

Perhaps Death Note so new anime viewers have a good choice to get into, also Code Geass and maybe Guilty Crown. (Haven't actually watched Guilty Crown, so it would be a series that I watch as I go). :P

I can also do other series, however from the three I posted you can probably see my preferred genre in which I've enjoyed watching/ working with. I'm not one to fall for a High school/ Drama series easily.

I figured I could add some old series with 25-50 episodes so users have more variety, to keep them coming back for more. <3

Lyrlei - August 19, 2014, 9:03 pm

If it lets me upload softsubbed mkv's i'd like to help contribute for Majimoji Rurumo. ; ;

Nevieth - August 20, 2014, 5:10 pm

I'm ready to contribute some subtitled series, I have Attack on Titan 720p fully loaded and ready to go, I also have the latest two episodes of SAO 2 which haven't been uploaded yet, Code Geass (season 1 and 2) along with Blue Exorcist in subtitled. Let me know if I'm able to contribute, because I would love to start putting some high quality older series/ completed series up on the site, due to having enough room to do that.

I'll also get some FMA Brotherhood to upload, figuring everyone loves some of that. ?

Let me know if I can contribute, and how and I'll get to it. ?

Tasemu - August 20, 2014, 6:16 pm

Haha alright, I wasn't planning on taking over someones project, merely worried people are going to get upset that Ryner has fallen just a few weeks behind.

If I'm allowed, I think I'll start off by uploading Attack on Titan in subtitled, figured that will drag in some extra viewers. ?

EDIT: Just realized I forgot to get your Skype, my Skype is NokoutHF as that was my previous alias. I rarely use Skype but I'll keep it online for a bit.
