No. It does not have a binding feature. You can always use an external binder though. Like this one: <https://hackforums.net/showthread.php?tid=3354709&highlight=binder>

gr8 b8 m8 i r8 8/8

Seriously though, this is a nice way to lose your gmail account. Luckily I used some crappy old one I've used as my "spam-box" for years. I wouldn't be surprised if this was a keylogger too.

cottonking - July 30, 2014, 3:30 am

so what? is this not legit guys? im looking for a new keylogger as syslogger is complete shit for me.

This is legit. If you have any suspicions, you can test it on Sandboxie or VMware.

Hire - *July 30, 2014, 11:17 am*

Scan this on Virustotal please, prob a keylogger...

oj900 - *September 16, 2014, 4:17 pm*

awesome share buddy, thanks for this and nice share?

Rj1122 - *September 16, 2014, 4:19 pm*

im intrested in this. but what is usb spread? just plugin in your usb and its there? or what?

Anonymous Products - *September 17, 2014, 6:32 am*

Works like a charm! Already managed to Steal a few League Accounts.

kenjackson1 - *September 19, 2014, 5:50 am*

The link to this download is dead, pls check and updtae

SK1DZ3R0 - *July 28, 2015, 11:11 am*

"file not found"

Could please reupload Im looking for keylogger builder with 'usb spread' option!
