0x80's Shell and Root Shop

NOTE: The shells can be used for anything you want (for example you can use them as DoS shells), whereas the roots can not be used for such activities. Anyone found to be using the linux roots for DDoS attacks will be suspended and will not be refunded unless they can prove it was somebody else who performed the DDoS attack (so if you buy a root, dont share access with people who you dont fully trust, as it may result in you getting suspended without refund.

Cheap Price - only \$0.50 per shell, cheaper for bulk amounts

100% Private - I wont give out the same shell to two different people

Custom Shell Interface - MulCiShell Mod, lots of features - shells can be preloaded with a different interface upon request

100% Fresh - These shells are newly obtained at the time of sale, via a backdoored webshell that recieves 100-200+ new shells per day via email

Linux-Based - the majority of these shells will be linux-based

Constant Supply - I have practically an unlimited stock
