Thread: [Visual Basic Theme Archive \(PACK\)](#)

**oRequiem** - July 21, 2014, 10:48 pm

Theme Archive

[img]http://a.pomf.se/lrapxc.png[/img]

This program pretty much has a few Themes for Visual Basic that you can save as a .vb file. Well here is a download and a Virus Total Scan to prove this isn't any type of virus or anything malicious.

Direct Download:

Your image is broken, and isn't this the archive that is really outdated and posted everywhere?

**oRequiem** - July 21, 2014, 11:36 pm

I actually haven't seen this anywhere and I'm not sure how to fix the image.

**GenericSkid** - July 22, 2014, 12:43 am

It's widely known. Ask anyone who's been around here awhile. As for the image fix:

Code [img]directImageLink[/img]It may need to be rehosted on a site like imgur, or pomf.se.

Well thanks for the image fix and I've only been shown this once so idk.

reposting 2 year old threads i see.

<https://hackforums.net/showthread.php?tid=2425888>

the creator even posted it here.

I didn't know that, by re-posting it, it would help out some people who don't know about it.

**Aeonhack Archivist** - July 22, 2014, 12:49 pm

No thanks, I am perfectly capable of using the search function on HF or Google. No need to use a shitty program with embedded ads.

Yeah, let's copy paste all threads from 2 years ago. In case people haven't seen it yet.

This program has been release so many times on this forum, what does your thread make better than all the others?

Please do research before you post.

Kind regards

Danmark

I don't think it's any better than others, just bringing something old and maybe some people forgot about it. Just trying to help.

I second this, this pathetic way of ads is such a waste of time.
