This is sad. It is tearing the jailbreak community up. Now nothing can be trusted. I mean Insanelyi is a illegal hosting repo, but it still has peoples personal information. Well, I guess Modmyi needs to crack down on their security now.

cyberducky - July 23, 2014, 4:33 pm

I used to use their repo, said to see them gone.

Let's not forget the Cydia alternative, imod, won't be released until iOS 8.

Judecca - July 24, 2014, 8:32 am

I'm not surprised. The jailbreak community is always on the move.

xploD - July 24, 2014, 10:11 am

Was impressive by the big boss one, but now, getting the feeling every single source is going to be targeted.. gg jailbreak scene.

Is that what their VIP is? Just packages not available to other people?

Marcus Hopson - July 24, 2014, 2:10 pm

Does this mean we can't use the repo anymore?

Echoz - July 24, 2014, 2:33 pm

Woah, what? There's a new Cydia alternative coming out? I'm out of the loop already after a month or so? >.<

Mi2414 - July 24, 2014, 3:33 pm

Modmyi is gonna turn into the InsanelyI. I see it happening..

peri0d - July 25, 2014, 12:59 am

Same thing like Installous. People just have to adapt i suppose.

Change happens for the better.

xploD - July 25, 2014, 1:50 am

I don't think Cydia will be replaced any time soon.

?pade - July 25, 2014, 10:55 pm

What is all this exactly? I'm kinda confused.
