Hello everybody im here to tell you about my skype resolver!

(Get) Skype Resolved

[Click here to visit our website!](#)

<http://skyperesolved.tk>

Welcome to my resolver

I don't use a API, I resolve it using my own method.

8 Servers

1 Sec Resolve time

Works for the latest version of Skype

Blacklisting starting at 6 Dollars

Fastest API Available!

Free Skype Bot

Features:

Fastest around!

Half a sec resolve time

Works on the Latest Skype Beta version

Lifetime!

2 API Types:

Standard:

The everyday API

Source API:

A powerful API that bypasses normal API Security Protocols.

You can resolve anyone blacklisted on SkypeResolved.tk

Priority Resolving

Skype Bot:

add: skyperesolvedbot

Use !help for commands

Sometimes you need to send your command twice

PM me if you would like to put a ad on the website

Doesn't even work lol. I just tried resolving my own Skype and the page just refreshes.

Dorrance - July 23, 2014, 9:32 pm

The resolver is not working you should fix it before posting this.

Aurora - July 23, 2014, 9:34 pm

Resolver fails to resolve my Skype. It just refreshes the page.

Sorry, I screwed up a cloudflare setting..

Working now!

Hidden™ - July 23, 2014, 10:25 pm

Send this my way if you would like, thank you!

HFTetramorph - July 24, 2014, 2:17 pm

We may be experincing some slight downtime later today, Im going to be upgrading the API system. All purchased APIs will still work!

ytsu12 - July 24, 2014, 5:29 pm

Awesome resolver it is epic! it works perfectly and instantly +1 for black list feature

HFTetramorph - July 24, 2014, 9:38 pm

We just added a skype bot

To use, just add skyperesolvedbot on your skype account

Type !help to get started!

APIs half off! Contact me VIA PM first!

BitCoin accepted :)

We have just finished coding our members area!

We have added another API type, this one costs extra and allows you to resolve people who have blacklisting..

Use the members area to track your API stats and Blacklisting info!

We have also change the pricing for blacklisting!

Lifetime blacklisting is now: 14 dollars!

420 Blaze It - July 25, 2014, 12:42 am

Not bad, too bad it didn't resolve mine :P

Sometimes it has issues :/

The way its setup, is the more a name is resolved it gets put to a fast cached, meaning it queries the name and then saves the IP twice a day, so the server load doesn't get used..

Sometimes it decides it wants to fast cache your Name, but it hasn't hit that twice a day mark.. So it errors out.

equireZ - July 25, 2014, 11:21 am

Hey so when you msg the skype bot, does It respond to you If you ask questions, or do you just command It by giving out the user's, and they give you the password?

HFTetramorph - July 27, 2014, 2:44 pm

WE JUST HIT 2K RESOLVES!

YAY!

I will be giving out some things soon!

You send it a command and it gives you their info.

!resolve [username]

!help

!version

All commands for the bot

Yes, My host decided it would be a great Idea to switch servers with no warning. So I dont have access to anything right now.

Surpass - August 16, 2014, 2:38 am

Well the site is down... That's lame. Was excited to seeing this resolver in action.

Oh well.. ?

Dayumm - August 16, 2014, 4:33 am

You really should buy a domain. .tk looks so.... poor

BigDap - August 16, 2014, 6:38 pm

He was using API's leaked from my resolver's sales.

GG.

<http://www.skyperesolved.tk/index.php> is gone though, so, glws.

Im sorry? I was using your API?

I was running my resolver off of a Dedicated server. I never interacted with anyone's API, also the resolver is supposed to be back up here in a few days.
