Thread: [Free Coding Service](#)

+Haze - July 24, 2014, 11:06 am

So I'm looking for ways to broaden my coding skill.

Send me your requests via PM or post them on the thread and I'll try and code it. Nothing too complex or overkill like a RAT or Crpyter.

I will be coding primarily in vb.net, but I know a little bit of php. And I could link your program to a MYSQL database.

Sending you a PM right now.

Hope it's not too complicated.

What;s the point if there's already millions of tools like that?

How about a LUA unlocker. For multiple online games. World of Warcraft would be a great one. If you to it in a MYSQL Database, I'll both help/just kinda watch. I'm learning more too.
