Thread: [DDOS'ing And Attacking HF Members` Sites \(0x68\) uid=1125619](#)

hyhyhhrf3 - July 24, 2014, 2:20 pm

Link to the user's profile: <https://hackforums.net/member.php?action=profile&uid=1125619>

After admitting to scamming multiple members, multiple times, 0x68 has found a new hobby; he's probably still scamming, but even better now, he's DDOS'ing fellow Hackforums members` websites.

Database entries of 0x68 DDOS'ing [Six-Nine's](#) stresser. I mean, the proof is overwhelming. Check 0x68's database entries, he's been DDOS'ing dozens of competitors` stressers, salesmen, and just normal members it seems.

With this being said, I want to know why 0x68 is still able to roam our forums.

Here are some more logs of 0x68: <http://pastebin.com/hkVmTzL5>

Active, open, and accurate scam reports:

<https://hackforums.net/showthread.php?tid=4322269&highlight=1125619>

It seems like EVERYONE has something negative to say about this guy...he's literally a parasite to our community. I can't believe this 17 year old dirty Arab wannabe thug is permitted to leach off of Hackforums.

Lies about sales (server output)

Scams

Attacks competitors

Attempts to frame other members

It's really upsetting to see bullshit like this. I suggest dealing with caution, or not dealing with him at all.

To staff:

Please don't junk or close the thread, it's a VALID community alert. If some of the DB entries qualify as illegal information please just extricate it

I don't see how he can deny logs taken from his own stressers account, unless he claims his own

booter account was 'compromised'.

Looks like he has attacked more than one members site from those logs.

However, he's only attacking booters so it doesn't really matter IMO. I understand attacking members sites is against HF rules, but less booters on the market isn't a bad thing that's for sure.

I've hacked several stressers over the past year, if I had my way they wouldn't exist.

All of you guys are idiots, this thread was made like 5 times and trashed all of those times.

It's not hard to download a database, open up the dump and change a few things around. To prove it, who the fuck uses XML-RPC on a stresser? LOL You must be retarded.

Dorrance - July 24, 2014, 2:42 pm

The site DB was leaked by their old hosting company due to them envying the stresser, second who may never know what his intentions maybe it could of been showing proof of the site hitting. Also those are a month old scam reports that have probably already resolved.

They took the time to edit over 600 database entries? Good joke, idiot.

Accused of stealing one, ok. Accused of stealing twice, fine... accused of scamming three times, weird. Accused of stealing four times, we have a issue.

If it walks, talks, and acts like a thief, it's probably a thief.

This sounds like that one time you tried to convince everyone your Skype was hacked ???

Dude, you have no place to talk here. Look at your reputation on HF Compared to mine. Nobody believes your stupid story of you being compromised and shit. You know you scammed most members on HF and deep down you know it's true. So you have no absolute room to talk.

Anyway, getting this thread trashed just like the others.

PS: To prove you're an even bigger idiot, it takes 2 seconds to run a SQL Query to edit 600 rows

You're retarded if you think it's not hard to edit a database within seconds. Whoever leaked our old source and database is obviously out to get at us.

Also, apparently I "Attacked" Six-Nine website. That's why Six-Nine trashed his own thread he had on me since he knows I didn't? You're an idiot Dominick and with that being said, I'm done wasting my time posting on your threads.

Agree with the statement above. Our stresser has been getting "hit" lately and I can think of one person who would do it to a brand new stresser..

You're full of shit, I didn't even do anything and even to proof that what you're saying is false.

When you make a DMCA report, they don't actually tell you who it's from so stop with your bullshit and go find the real person that "Reported" your website.

What I see so far, is claims without any proof

Apparently I attacked some members and websites (Proof? None because a SQL Dump/Database can be easily edited)

Apparently I reported someones PayPal and Stresser or some shit like that (Proof? None, because obviously I didn't do it and it's just some other shit to make me look bad)

Let me clear this up, everyone who are making these claims are just pissed off at past issues I've had with them. They're nothing but little drama queens of Hack Forums, welcome to reality boys.
