Thanks for this. Very kind of you, I was looking for the Crypto custom algorithms and now I have all in one.

Everything could be Google'd, this thread would eventually die, it's pointless.

cjack - July 25, 2014, 11:24 pm

Hi Tweety! You are right but maybe you can spare time getting all of this algos in one pack. I also want to update this thread with new unusual algos and implementations.

IAmNotHere, thanks for your PM, I'll add 3des decryptor ASAP, sorry for missing it!

IAmNotHere - July 25, 2014, 11:58 pm

I am going to give these codes a try in my new crypter to see, if detections will decrease.

C(U)Jack.
