Thread: [Image icon for Skype to spread my RAT](#)

SandboxedSon - July 25, 2014, 7:29 am

I want to bind my RAT stub to a jpg image icon to easily spread to my friends or someone else. I need the icon of an image that you see when you actually send an image to someone so I can use that. Thanks.

(I'm not talking about Skype icon, but a normal image icon).

Spritzpups™ - July 25, 2014, 7:30 am

give me a minute i will give it to you

here it is

<http://www.convertico.com/images/1406298657.78/146.ico>

this is for jpg but i have some more

Anonmoosekaab - July 25, 2014, 7:30 am

It doesn't matter what icon you use, Skype always resets the icon to the default for .exe

Perfectionist - July 25, 2014, 7:30 am

I believe you can't send spoofed .exe's on skype, and I also think Skype doesn't show custom icons. Sorry

this is for jpg but i have some moreThanks! This is all I need for now ;d.

How do I load a different file from Celesty Binder if it's not a .ico? How do I make it .ico?

coolerfarmer - July 25, 2014, 8:33 am

can't you use Google?

just search for "jpg to ico online converter"

BlueNotGreen - July 25, 2014, 8:51 am

Sorry to inform you but if you are trying to send the file over skype the icon wont show up it will be default executable file you could always try sending your virus as a .bat because if the person is stupid then they wont know its a virus?
