I VOUCH !! for this sexy keylogger...
fast,convenient,safe and awesome
FEELING LIKE MY MONEY DID NOT GOT WASTED :)
(Jul 31, 2014 07:52 PM)Autocorrect Wrote: [\[CITE\]](#) Vouch for ???????†?!

Hawkeye Keylogger is easily one of the easiest, most advanced keyloggers available on HackForums. I definitely recommend purchasing.

Design
Beautiful theme, nice layout, simple design.

Features
The program contains many methods of creating keylogging files, making it very easy for the end user to create and spread their infected programs.

Power
I tried this program on myself. Very effective, works well and fast!

Wonderful program, ???????†?.
Overall rating: 9.5/10
(Jul 31, 2014 08:51 PM)kingxd Wrote: [\[CITE\]](#) The Keylogger is defiantly solid and worth buying, I like the design and how easy it is to use. Would recommend buying.
(Jul 31, 2014 10:07 PM)Marauder ?? Wrote: [\[CITE\]](#) I have recieved a vouch copy of this product and I must say it is amazing

The UI Is solid, both visually appealing and functional with lots of different options

There are a wide variety of features availible that you don't see on many loggers

And I must say it definitely works, I tried it on my friend just to see and it snuck right past his anti-virus and worked like a charm

I would definitely purchase this!

Features:

There are features in this logger that are not in others, feature filled, and quite exceptional (9.5/10)

Overall:

I am quite impressed with this, It has email, FTP, and PHP, which makes thing safer and more secure for your logs.(10/10)

Well done and thank you for allowing me to test this KeyLogger!!! Good luck with sales!

(Aug 1, 2014 09:31 AM)P????ce Wrote: [\[CITE\]](#) A big vouch for ??????†? for this product HawkEye Keylogger.

Design: Really user friendly, every option is in it's own tab so you won't get confused.

Features: USB Spreader & Password Stealers are really awesome features in it, along with screen logger. All wanted features at one place ?

Delivery: Supports 3 types of delivery i.e. SMTP, FTP & the safest way ever for your logs to be delivered i.e. via PHP ?

OverAll: Keylogger's main goal is to provide as many possible features as possible to users so making it fud is not the primary purpose, you can use variety of crypters to make it fud ?

HawkEye is a Complete Keylogger.

excuse my english1. It's not fud you can use kazy crypter & probably data protector will work, more confirmed list of compatible crypter will soon be published.

2. Generate a Keylogger.exe file using this keylogger & send it to your victim, you can have a look at this tutorial:

No there is no such tutorial here. We don't teach people from A to Z. I hired new supporter who can teach you but it may charge you extra for teaching. Once you purchase then I'll tell him to contact you.
