Legit Scam Report OP.

How is it funny when you have scammed over \$2k+ on this site.

OT : Sorry for your loss OP.

No idea why you'd buy off a regular member with 50 posts... but yeah..

Abdilo - July 26, 2014, 2:13 am

>few year old thread

>posts now claiming someone asking a question is a scammer

What?

Trojan Man™ - July 26, 2014, 1:31 pm

thanks for your support guys.

i still didn't get any news from him.

Minecraft1001 - July 27, 2014, 5:33 pm

Maybe he is just legitly offline?

It is summer after all.

Its hard to say really as I myself have bought from multiple users on HF & have seen users go up to a week before replying with a product.(I'm talking guys with 300+ rep lmao and thousands of posts)

He pmed me previously offering to use a middleman, so he seems pretty legit.

Also it seems silly to scam 20\$ lmao

I understand your concern though.

I know the feeling.

I don't know how to resize the images or put them in spoilers. As it seems 2 users gave me a neutral rep (0) and a (-3) rep. First ones I've had so I don't know if I should be happy or not.

I received the bitcoin payment on

2014-07-24

I logged in 23-24 hours later here is an image of when I have logged in

[img]http://uploadpie.com/2ihoQ[/img]

The dates are not up to date I don't know why but any staff/admin member can verify of when I last logged on

2014-07-25

which is about 10 hours before the scam report was made.

I tried sending him a message with the source but his inbox was full. I saved the draft but as it seems the date is not displayed for saved drafts only for sent Private Messages.

He sent me a message with a link to the scam report on

2014-07-25

20 minutes after he made it that is the only time he has contacted me after he made the payment so him saying he has sent me messages and I have not replied is a lie.

There is a reason why he didn't post any images of the sent private messages he claims to have sent me because they don't exist.

Basically he made a scam report 32 hours after he sent me the bitcoins. It is his fault for not clearing some of his messages that I was not able to send him the message the following day. Also we can see on the private message where I tell him some information about the source. He can post the source if he wants or just verify that it is true about what I said so as we can see I never planned on scamming him.

This is basically a case of a user who wasn't patient.

I did sent him the source soon after I logged in on
2014-07-26

about 22 hours after the scam report was made.

If I remember to add more things relevant to this scam report I will do it.
