No, but it is explained in a very detailed manner, in a way that you will be able to understand as long as you understand the english language pretty well.

I also am willing to offer support if you can not understand the guide properly (it's very understandable)

Better yet.

1. Sign-up at PEGym.
2. Read the intro articles and you will probably stumble upon Jonpop's article.
3. Do JP90 for 90 days as instructed.
4. See gains.
5. Save yourself \$15.

Or this is that free site that is on the internet where a girl told her boyfriend to use a nitric oxide booster and a test booster in order to gain 3" in length.

eBooks like this don't work. There's no scientific way besides surgery or pills to enlarge your penis. Jelqing, which is the often misunderstood method of penis exercising, will not actually enlarge your penis.

I'm severely skeptical.. There's no medical evidence that you can get a bigger dick without risky surgery (which deforms your dick anyways). Ketel exercises are bullshit too.

This. Herbal remedies are bullshit, ketel exercises are also bullshit, lifting weights with your dick is bullshit, taking drugs is bullshit, pumping lasts like 10 minutes and it can deform your dick, and surgery is risky and not even worth it. Honestly, everyone just needs to be confident in what they're born with. After all, having a big dick doesn't satisfy a woman as well as being a master of oral will. ?

Technically speaking it's literally impossible to make your penis longer in any way other than losing weight or surgery. Five minutes of research will tell you this. Surgery and losing weight. Exercises and other mumbo jumbo will just give you a moral boost but the reality is the length and girth are unchanging. Furthermore unless you're way below average, we're talking 3-4 inches, you shouldn't be worried about this shit all. Not to trash OP's sales, it's just the facts pointed out.
