For it to be pretty fast I would go with slicethepie.com and do music reviews. You will have to cash out at 10\$ though.

50 cents will not get you very far with investing. How about you trying something like ppd, or slicethepie.com in order to get that starter money to do these services.

Are there any methods that don't require start up money yet will always work/be consistant? They don't have to be really profitable, I just want a method that I will be able to make something from since I am just starting. I don't care if its white hat or black hat.

There are many things you can do that do not involve an investment. PPD, PPI, and E-whoring are just few. You can find sections dedicated to these topics on this site. You can also add my skype onlinemonetizer for assistance.

I added you on Skype, I'm hoping to try to make some extra money on the side besides from my current job, I'm not sure what I should get into to start me out at first.

My skills:

Programming

Website development (back end)

A lot more IT related skills but too tired to post them all

I just really don't know about SEO too much so I'd have to do some research into it to figure that out.

I also have some money to invest if needed.

How is this for my first attempt? <http://nfl.yourfreetickets.com/>

I'm using multiple subdomains on my domain yourfreetickets.com to attract different streams of traffic.

Nfl,nhl,gaming, stuff like that.

All traffic incoming is targeted to the specific subdomain.
