Thread: [I published an android app/game. How do I promote it?](#)

Psychedel?c - July 29, 2014, 8:03 am

I hate to fucking advertise here (because I know how fucking annoying it is when I see an advertisement in the lounge) but I made a new android game and have no idea in hell how to promote it, any ideas?

The link btw:

https://play.google.com/store/apps/details?id=com.BlazedLiquid.Ice_Hop

Please remove this if it violates any rules, don't want to ruin my account or some shit over a stupid post.

Try advertising on google+ or on google play itself.

I will try it later, looks cool.

Give it to friends at your school (if you goto school) and if they like it they'll give it to their friends, etc.

Psychedel?c - July 29, 2014, 8:18 am

Holy shit. Please fucking kill me, I can't believe I did that. I'll fix that right away. "hiscore" lol.

Social media marketing is your best bet. Buy a twitter with targeted followers and blast your link once in a while to get some installs. If it is a good app, people are going to automatically tell their friends, who tell their friends, and so on and so forth.

You can also buy google play reviews. Go to blackhatworld.com and make a thread buying reviews. I think they are \$1 per review. Reviews help a lot and can boost overall ratings.

Any cool hidden secrets we should know about? :3

PAFE - July 29, 2014, 8:36 am

I'd recommend social media. Try and advertise it through friends and family as well, and hope they share it on social media and with their friends and family.

Idk if this would work, but add loads of people on skype or use a website, and use a chat bot or some shit to send the link and hope people download it.

Yeah thinking about using youtube, like a viral video would do some good for promotion lol. Maybe try contact a well known YouTuber and see if they'd be willing to advertise it. Or another way would be vine. So many people use vine nowadays and I'm sure some well known people there would advertise it for a price.

You could also just use annoying hashtags on twitter and Instagram and see if that helps.

Or go to someone that's offering services or retweeting your tweets about the app to loads of followers.

Idk, I've never advertised something before. But goodluck with your app.

Nysta - July 29, 2014, 9:14 am

Social media, and if you have some cash to spare you could set up an admob campaign to get some exposure.

Man16 - July 29, 2014, 10:52 am

Including some gameplay pictures on the app description list helps A LOT.

Eternal. - July 29, 2014, 10:58 am

Not sure but I reviewed it and gave you a 5 star for it. Good luck.
