Thread: [Do you want to start your own VPN service?](#)

Six-Nine - July 29, 2014, 1:46 pm

Have you ever wanted to start your own VPN "company" but never known how to do it? Here is the BEST solution for you!

I offer you many services.

Custom Client - \$40 (\$140 for source code)
Server setup - \$5 per server

Automatic portforward script - \$30
PayPal autobuy script - \$60
4Virtuals autobuy script - \$65

Servers:

Sweden - \$12
France - \$12
Germany - \$12
Netherlands - \$12
United States - \$15
United Kingdom - \$14
Singapore - \$10

Terms of service:

If you dont purchase the source for the custom client it will cost you \$10 for every update in the client.

All sales are final.

No refunds.

No chargebacks.

Payment methods: PayPal, Bitcoin, Credit Card, Paysafecard, Perfect Money, Google Wallet, Dwolla, Litecoin, CashU, Ukash and 4Virtuals balance.

(Aug 3, 2014 09:35 AM)Six-Nine Wrote: [\[CITE\]](#) 2) Just because you know PayPal IPN it doesnt mean that you can make it add users on the servers etc. On WHMCS you need Freeradius wich is about \$150.

3) For \$5 per server you will get on-shore with bad specs and network speed.

4) The automatic portforwarding script is very cheap. Maybe you think that it is manually? Its fully automatic and the user himself can open ports.

Next time you try to sales thrash, get some facts.

Now sit down and enjoy the neg.

2) You can use PAM or LDAP, really easy and again, a free alternative. Oh wow, you CLEARLY don't know what you're doing if you're PAYING for a PAM service.

3) You don't need good specs for a OpenVPN service, just good network speed. Ever heard of DigitalOcean? OVH? Ramnode? I can list so much that's offshore and \$3 - \$5. They have really fast network, some are even gigabit.

4) iptables, nuff said.

Thanks for the neg, I wasn't even sale trashing I was just helping you out because you clearly have 0 sales.

2) Depends. + for a \$5 server you will rarely get a 1 Gbps speed.

3) DigitalOcean is not to recommend as VPN location as they keep you charged for what your users are doing.

4) No shit but you need to make it auto too.

Six-Nine - September 9, 2014, 11:50 pm

I am still offering this service. Let me know if you want to buy.
