Thread: [Skype Voice Control! Control Skype with your voice!](#)

Drizzy?? - July 29, 2014, 4:38 pm

Need a FREE skype bot? [CLICK HERE](#)

Welcome to Drizzy's fully automated skype! The title is self explaining, you can fully control your skype...with your voice.

Requirements

- *Microphone (headsets work best)
- *Have skype open

Recommended

*Go through the speech recognition configuration process. This will help the program recognize your voice easier.

To follow the configuration process, follow the steps below

- 1) Open Speech Recognition
- 2) Right click it, and click Configuration -> "Improve voice recognition"
- 3) Follow on screen instructions

Features

- *Change Online Status
- Simply say any of the following:
"online", "offline", "disturb" (sets to do not disturb), "invisible", "away"

*Skype Contacts

- 1) Simply say a Skype Username
- 2) Choose any of the following options:
"call", "message", or "resolve"
- 3) If you're in a call, you can say either of the following:
"stop" (ends the call), "mute" (mutes your microphone)

*Mass message

- Simply say "mass message" to send a mass message to everyone!

*Skype

- Say "skype" to bring up skype.

How to Get

Let me know how you like it! ?

Satan Elf - *September 3, 2014, 1:56 am*

the download link in the original post is not working

Green Dot - *September 3, 2014, 10:35 am*

Speech recognition wont work in my os cause my language

TheCl0wnhelper - *September 3, 2014, 2:14 pm*

I actually never knew that the speech recognition came factory installed with Win 7, the more you know. Thanks Drizzy!
