Thread: [Printshare - Take & Upload screenshots](#)

ownerx - July 31, 2014, 6:58 am

Decided to release this to the community,

Whenever you run it, it will run a background worker. When you press CTRL + Shift (editable) you can take a screenshot (custom bounds)
Then it will upload it to your website.

Download: <https://www.mediafire.com/?ex307mc0303ess2>

Stuff to change:

Form1.vb:

search for:

Code 'EDIT THIS!Edit these 2 lines:

Code UploadFile(currentpath, "ftp://mywebsite.com/images" & format & "", "FTPusername", "FTPpassword")

Process.Start("http://mywebsite.com/images/" & format)

HustlerEnergy - July 31, 2014, 7:00 am

FTP is insecure if you are using it this way. I suggest you use PHP inside your VB app.

That's pretty neat man, well done. I will actually try this out. It has a keyboard hook so that you can use the shortcut whenever right?

Yeah, even if you're playing games it'll still launch. However CTRL+Shift is not a really handy combination, so you might want to edit it :p

Looks awesome man. Thanks for the share :P

Bicycles - July 31, 2014, 11:28 am

I'm downloading it right now.

I really like the name by the way!

SaketSaket - July 31, 2014, 12:22 pm

Nice work mate... Keep coding & keep sharing ;)

Bicycles - July 31, 2014, 1:18 pm

I made a v2.0 of this application with a lot more features :3
