The dox includes all the information we can attain on the said person.

If we can't complete your request, you will get a refund.

As for doxing and detracing, it's better to contact -zYMTOM', he has more experience than me.

Also, if you encounter any issues with any of our members, contact me.

How much to obtain files+scripts + all needed to mount the same web from a "web-game" online? Is not ran by professionals.

Last guy who told me on my thread (Told me that he could do it for 200\$ but, he was refusing to use Middleman). How much would cost? :)

PM me to get the website

Kululu - August 3, 2014, 8:37 am

Can you hack someone's game account that I only know of his IGN ?

King Cin - August 10, 2014, 4:29 am

For those that do not know, web retracing is basically anti-doxing. Send me a PM if you need it.

Eladictococy - August 10, 2014, 3:12 pm
