Thread: [help upload shell in government site](#)

asm-99 - August 1, 2014, 3:17 am

hi

bWfYYS5nb3Yub20vaW5jX3VwbG9hZC5hc3A=

Can any one try to upload shell? I try but no luck, I think the uploader's corrupted

RelationShit - August 1, 2014, 3:19 am

Haha nice thing you did there. (Encoding)

Josh? - August 1, 2014, 3:44 am

Doesn't work. Nice encryption though.

TheWholeWorldExplodes - August 1, 2014, 3:50 am

He literally put it in an online base64 encoder. How the fuck is that "nice encryption".

The shit that gets rewarded on HF these days

More of a relevant thing to add to my post to get 35 chars without breaking the rules...

Understalker - August 1, 2014, 3:55 am

BRO rly sick encryption omgee!!

how did u ever encrypt is so good omg??

This cant be found anywhere public like a base64 encoder site or anything lyk that ritee

RelationShit - August 1, 2014, 3:56 am

This cant be found anywhere public like a base64 encoder site or anything lyk that riteeYou just defeated the purpose of the encryption/encoding...

Now any skid can decode/decrypt it, now that you named the encoding..

Danny Brown - August 1, 2014, 3:58 am

Why dont HF users all have their PGP public key in their sig :D

asm-99 - August 1, 2014, 4:03 am

What's with the encryption?

I choose it because it's VERY easy to understand that it is Base64, and I encrypt it because of the google bot (=

I don't want to see someone type in google the file name then he come here which might put me in alot of trouble.

You're GENIUS BTW :)

Oh I forget to mention that, this thread is about uploading shell and I think you did it :)

Stop talking and start doing GENIUS ENCRYPTION

x0rk - August 1, 2014, 5:09 pm

(Aug 1, 2014 03:58 AM)Danny Brown Wrote: [\[CITE\]](#) Why dont HF users all have their PGP public key in their sig :D

Probably because it's the clear web, and many people can not imagine how they are monitored here.

AURUM - August 1, 2014, 5:36 pm

well I got this :

hoer- - August 1, 2014, 6:08 pm

ITT: People who don't know the difference between encoding and encryption.

hahdbwoannniabs - August 1, 2014, 6:57 pm

When you try to upload a PHP shell it gives you a security alert.

When you try to upload anything with a different extension, it gives you a 500 internal server error.

This is useless.

asm-99 - August 1, 2014, 8:49 pm

(Aug 1, 2014 05:36 PM)sp4ceRH1N0 Wrote: [\[CITE\]](#) well I got this :

Good, I think this mean your shell is uploaded.

But the server delete it because it's contains malicious code.

BTW, how did you upload it?

I try to upload file.php contain:

```
<?php>
```

```
?>
```

and it gives me: 500 internal server error

AURUM - August 1, 2014, 9:10 pm

lol. I pressed the upload button. Not much to it. I use C99 shell btw

Toasties - August 1, 2014, 9:11 pm

Try

```
Code <?php ?>
```

Not...

```
Code <?php> ?>
```

In cryptography, encryption is the process of encoding messages or information in such a way that only authorized parties can read it.

great b8, you cock juggling thundercunting slut.

RelationShit - August 2, 2014, 3:45 am

great b8, you cock juggling thundercunting slut. You get the same results for "base64 decode" and "base64 decrypter"

That's why I'm confused.

cryptography in any form is the process of obfuscating a message, text, or a piece of information, whether that be an EXE or a sentence. Base64 works by encoding the characters, thus obfuscating them. therefore it is encryption of sorts. Pig latin, while primitive is still encryption.

Dr.d3v1l - August 4, 2014, 4:39 am

fucking encryption -.-" base 64 ahah
