Thread: [\[Theme\] \[Requested By Many\] Valley Theme \[GDI+\] \[9 Controls\]](#)

Earn - August 1, 2014, 11:11 am

Hey guys! Many people have asked me to create this theme in my Suggest A Theme thread, so I decided to make it!

Image

Controls

Credits ([Click to View](#)) • Earn

- iSynthesis
- Mavamaarten~

Please leave a comment of your honest feedback of the theme. I would greatly appreciate it.

Silent ? - August 1, 2014, 11:13 am

Looks badass! Keep the work up I might use this in my upcoming products and give all the credits to you for the theme.

+Haze - August 1, 2014, 11:23 am

When can I meet you for your well deserved blowjob?

JK, but this theme is sexy :D I will defo save this and use it. Thanks Earn.

SaketSaket - August 1, 2014, 11:26 am

Nice theme... Is there any specific reason you created all three control box buttons as different control...?

With Tab this theme will look perfect ;)

Earn - August 1, 2014, 11:29 am

With Tab this theme will look perfect ;)

Some people only need the close button, or the close button & the minimize button. It is just for convenience.

Also, I will be making a TabControl for this theme soon.

SaketSaket - August 1, 2014, 11:36 am

I asked because You can allow to disable any specific control button from all buttons if not needed the way we do in default form settings...

SIM-1847363 - August 1, 2014, 11:40 am

Very nice job, i love it, but i have a question. Does the form have Padding property, so you can dock controls inside the form(or below the header), its not that important to me its just a little feature, that i have been looking for. But nice work tho.

Earn - August 1, 2014, 7:46 pm

(Aug 1, 2014 11:36 AM)SaketSaket Wrote: [\[CITE\]](#) I asked because You can allow to disable any specific control button from all buttons if not needed the way we do in default form settings... It was like 4 AM when I coded them. I couldn't be fucked.

SaketSaket - August 1, 2014, 11:31 pm

(Aug 1, 2014 07:46 PM)Earn Wrote: [\[CITE\]](#) It was like 4 AM when I coded them. I couldn't be fucked. Sorry... Never wanted to offend you... Just curious as it's very useful feature which i never implemented in my themes... Now i am going to use it in my future themes... ;)

Earn - August 2, 2014, 1:07 am

Oh, I wasn't offended at all. It was a good idea.

WZDY - August 2, 2014, 1:52 am

Looks freaking awesome! Can I use it in my future project?! Credits to you.

Earn - August 2, 2014, 6:10 am

(Aug 2, 2014 01:52 AM)TommyLee123 Wrote: [\[CITE\]](#) Looks freaking awesome! Can I use it in my future project?! Credits to you.

Thanks man. Also, sure. Why else would I release it? :P

iSynthesis - August 2, 2014, 7:49 am

The code looks very similar to mine (Flat UI)

All the region names and the overall order, if that's the case, credit would be appropriate, If not, i apologize,

Theme looks decent enough, keep up the good work.

Earn - August 2, 2014, 9:10 am

Added credits man. Sorry, I totally forgot. I have only worked with Aeonhack's Themebase & I wanted to make this full GDI+, so I was referring to your source on how I should tackle certain things.

?eumonic - August 2, 2014, 12:31 pm

The code also looks similar to mine, but its not really the base that matters. The main idea is the actual control design. It is the same concept as the people who started crediting aeonhack for all themes because he made the themebase, even though he didn't have any say in the designs people did. He may have used your (or my) base to start with, but the finished product is very different looking and that's the important part.

LethalNET - August 3, 2014, 3:20 am

Like before, inconstancy in your coding shows that your Checkbox and Textbox were copy pasted, The fact you only used ByVal for those two controls and not for the rest and changed from If Not ---, to If --- IsNot -- only changing and being apparent in only the checkbox control and textbox.

Snippet from your code:

```
Quote:Private TextAlign As HorizontalAlignment = HorizontalAlignment.Left
    <Category("Options")>
    Property TextAlign() As HorizontalAlignment
        Get
            Return _TextAlign
        End Get
        Set(ByVal value As HorizontalAlignment)
            _TextAlign = value
            If TB IsNot Nothing Then
                TB.TextAlign = value
            End If
        End Set
    End Property
    Private _MaxLength As Integer = 32767
```

In which I found the exact same code right here:

<http://www.scribd.com/doc/192600901/Loginbuttonandtext-Gdi>

from 2013.

Just like your visual studio theme, poorly coded and CP'd from others work.

The design is ok though.

Earn - August 3, 2014, 2:48 pm

As I said before, I did not know about the properties & shit, so I got it from other sources. The code that you linked is from Mavamaarten~'s Ghost Theme. I have left credits in the description. None of the actual design was copied from anywhere, & that is the main part, as it is a theme. If Mavamaarten~ requests that I change the code, I will be more than happy to.

Dr.Xavi - August 3, 2014, 3:30 pm

Thanks Earn., keep up the good work.

Bcoder - August 5, 2014, 3:30 pm

Thanks a lot for theme bro, i like it :)

Bruh - August 6, 2014, 9:59 am

Hey man! The theme looks amazing and would love to use it for my next project. Unfortunately there is an error when adding the theme skin to my form. It would be awesome if you could look into it.

Cisteriaso - August 6, 2014, 11:41 am

I like this theme, it's clean and good colours in it, keep up the progress on it.

omdiyar - August 6, 2014, 3:42 pm

sorry but have a problem in vb i try to use the theme in "class" i hit F5 after stop the project i see the theme but have a problem "parameters invalid(my english x.X)

Xervo - August 22, 2014, 3:06 am

Awesome them Dude ! Great work ?

zyvox - August 22, 2014, 3:24 am

Looks amazing, would be awesome if you could add a listbox/tab control aswell.

CottleSilver - August 22, 2014, 12:12 pm

Well it looks 10/10, works 10/10 so you got a perfect 10

[KE]Helios - August 22, 2014, 1:44 pm

Really nice and fancy theme :)

But I get an error:

[img]http://img5.fotos-hochladen.net/uploads/234v5b2ejix9ukn.png[/img]

muhuwj2 - August 23, 2014, 2:32 am

Wow. This is one of the best themes I've ever seen. Keep up the good work! :)

Earn - August 23, 2014, 5:29 am

I have fixed the error everyone. I am glad that you guys like it. :)

Protótype_ - September 6, 2014, 10:28 pm

Looks great, may use this in one of my projects

Xghost7 - October 23, 2014, 7:12 pm

Looks awesome but a strange bug happened to me where all controls dissapeared suddently and when i was doing form_load events the theme was becoming white blank... i cant use it anymore

r00t_z - October 24, 2014, 8:30 am

Looks very nice! Keep up the good work man!

kenny3514 - October 24, 2014, 11:22 am

Thanks man is very usefull, thanks for share :)

joneh heil - October 24, 2014, 12:26 pm

Thank you for this Earn. sexy azz theme <3

xRaiders - October 24, 2014, 2:23 pm

Thanks for this theme bro, good job

Archives - October 24, 2014, 2:23 pm

Wohoo! I love seeing new themes. OP Good Job. Theme is just mind blowing.

AngryBirds - October 24, 2014, 4:20 pm

amazing theme bro thanks for share!

DionTerry - October 25, 2014, 10:25 pm

Wow great theme i've been trying to get one with the colors and circles control box, thank you!

Nidzgorus - October 25, 2014, 10:31 pm

Very good worl. Nice

Awesome share

FFFO - October 27, 2014, 6:18 am

Yo Earn I can't PM you, but could you code me this Control in GDI:

I would pay you, PM if you have Skype.

GhostRolly - October 28, 2014, 2:36 pm

Use this theme all the time. Looks great! :y:

Xghost7 - October 28, 2014, 10:43 pm

Yo guys anyone know's why this problem is occuring? when im writing some code at the form_load event the designer becomes like this and i have to restart vs to get it back to normal:

EDIT:

Ow god look what happened suddently.. i am coding my form_load event and those 2 problems happen, this one is the most annoying please tell me a fix im so lazy to put the buttons and everything again, what it did basicly is it removed any controls from form but still have the variables.

OffCode - October 29, 2014, 10:34 am

Nice theme man thank for share! Its awesome! :P

Earn - October 29, 2014, 7:09 pm

Try right clicking the theme & pressing "Send to back".

Yeah, I could probably make that. My Skype is EarnHF by the way.

Mist-chaoshackerz - November 11, 2014, 8:27 am

Nice job man, i would love to do one but too lazy:D

CheckFallen - November 12, 2014, 4:59 am

This theme looks great. Can't wait to use it on my next project. Thanks.
