Robbin in the Hood - May 23, 2010, 12:44 pm

Well, someone is giving me free installs, yes this sounds dumb im new to this shit.

But i didnt get no bots.

Does my server need to be FUD for this? cause the AVS would kill it right?

We are having a little arguement.

You Are Free - May 23, 2010, 12:45 pm

Your bot must be FUD, if not it will only pass on some computers that don't have AVs.

Robbin in the Hood - May 23, 2010, 12:45 pm

Thank you, now tell this to Swag.

minimal?st - May 23, 2010, 12:46 pm

Dude, out of 1300 bots, not all AV's will kill it.

I ran him 1300 bots, for free, and none joined, it is on his side.

Robbin in the Hood - May 23, 2010, 12:49 pm

No , my shit is not fud. Meaning there AVS are gonna kill it.

We just tested on my friend, worked fine. On your side buddy

How "Fud" is it?

I run my 4/20 unencrypted bot on 200 victims and i get a good 170 of em.

Yea, it's either on OPs side, faulty crypt, or maybe the site hosting the bot file isn't working right.

I didnt crypt it, the site worked cause my friend tried it, so its on his side.

Wait so youre arguing over 1,300 free installs? Starting up drama over free shit? Its like a homeless man going into a homeless shelter and trash talking the food and whining about it.

Robbin in the Hood - May 23, 2010, 1:00 pm

No im not, im saying i did not get any, he is argueing saying i did. I can care less.

Kamay - May 23, 2010, 1:01 pm

I'll take a test run of 1300 and see whos wrong

minimal?st - May 23, 2010, 1:06 pm

I am also using gBot, and he is using Swarm.

Cephei - May 23, 2010, 2:14 pm

I'd be happy to settle this with my FUD server, but seriously, how UD is your server?

BigKesh - May 23, 2010, 2:15 pm

remember what i told you about fudness and CPM

DaRkOoO - May 23, 2010, 2:27 pm

Even if it is totally detected, it will pass on like 300+ from 1300..

Btw, you gave him 1300 bots for free?

ffs :P

You didn't get no bots, so that means you did get bots, because if you DIDN'T get NONE, you must have gotten some.

What's the problem?

Break the sentence down, not too complicated.

He didn't get NO bots.
NO = 0
Meaning, he didn't get 0 bots, inferring he actually got something.
Kk?

Newcastle FC - May 23, 2010, 4:11 pm

People are always saying "if its not FUD you wont get many bots"
Around half of my bots online now on my rat, which is around 500 have no av installed.
Plus the detection rate after encryption is usually 4/21 or something similar, the chances of them having these av's is smaller, therefore increasing the chance of you infecting them, if you got literally none then your bot has either been corrupted/not compiled correctly.

Ag0Ny - May 23, 2010, 4:14 pm

Are you fucking complaining when he was giving you FREE installs.

haha pathetic.

Get the fuck out kid,
I am not complaining this has nothing to do with the bots.
He is a friend, and i we started to argue, not about me not getting bots but about THE REASON i did not get any.

not that i did not, just the REASON. Get that straight.

out of 1300 bots, over 100 won't have AVs

Made me lol.But seriously, dont post threads like that after you big yourself up saying you can DDOS someone.

Brosa - May 23, 2010, 4:54 pm

The flamming is starting :/ And if Swag says he did 1300 installs and you got nothing theres a problem with your bot/hosting. Did anything ever connect with the current Bin your using?

Peace

@Cephei, Nope just talking to the skiddlemeister

Robbin in the Hood - May 23, 2010, 5:09 pm

Yup peace.

You have no room to call me a skiddie , you need to look up what a skid is.

Closed, so i don't have to hear you fail.
