Thread: [\[UPDATED\]Note When E-whoring.](#)

Useful note when you are E-Whoring

When you are E-whoring you have to know how to seduce the client so he can fall for it and buy a cam show or some pictures off you. Always have your VCW setup, so you are prepared, this rule is the same when u are using KIK, get your picture pack ready and know when they ask live sample which pic u gotta send and not send a random pic.

Some overall steps in E-whoring.

1. Always have a plan

+--

2. Be prepared for what the customer can ask

3. The client must have trust in you.

4. If he asks for proof give it to him but don't give him too much freebies.

5. A handy tip: If you wanna seduce him, show him your VCW on cam to tease him a little bit already and maybe send him a pic of the E-Whore if u have one, not showing too much of course.

Tip of the day

-align=center]A very good tip is when a customer send the money through amazon/paypal fake it with Inspect Element like the payment was Denied/Canceled/Failed or something like that, and send him a screenshot where it says like 'Payment Failed': Example[/align]

E-whoring on kik

This is one of the ways to E-whore, by using kik on your smartphone if you prefer but you could also use bluestacks if your laptop/PC can handle the program.

1. Try giving them a nice talk, to earn their trust.

2. Dont get direct to the point, like say it in a sneaky way but still like make it obvious your selling, when they ask for a sample you give it to them but don't send like 5 samples where you show everything they want, just send them (I prefer a clothed) sample to earn their trust ur real, when they ask for a live pic you can use on Android the app 'Fake Camera' which can make a gallery pic turn into a 'live/camera pic'

If you E-whore for the first time you normally won't be very experienced and probably will not be doing well, after a first payment i would recommend going on with this as the more you do this the more you become experienced, but don't get too cocky.

I made this tutorial for new users and users who have a little or no knowledge in E-whoring.

I was trying for like a week with no pay... Then I quit doing it... I don't know it just doesn't work for me. I have VCW and pics. Can someone recommend a method for me?

Mr.Luce - August 1, 2014, 2:42 pm

I have Updated it with some KIK tips as well.

If you want more money when E-whoring, tricking the client in sending more you can simply inspect element by editing the HTML code.

What do you mean by this? I don't get it. Thanks for the tips tho

Mr.Luce - August 1, 2014, 2:44 pm

Inspect element just lets you see the HTML and CSS and all the scripts that make the webpage work. You cant edit the website. Maby you can locally, but it wont change anything on their servers. It's mostly for web developers that want to observe a piece of code.

Do you use security measures when E-Whoring? I might sound like a dumbass when asking this, but it seems "less" illegal than a lot of other things. Just how much trouble can you get in?
