envira - August 1, 2014, 9:36 pm

Hello friends,

Its been long time since we from our studio has released a theme.

Its due to the busy schedule, in our personal lives. Yet we bring our new product for you "Majestic", MyBB theme.

The theme is released in 1.6x Version and soon would be the first one to get updated to MyBB 1.8x Series and to all our customers who purchased this theme, the 1.8x series upgrade would be a free download :).

The theme boasts some of the best features, which you guys would experience probably for first time in within MyBB.

Features

Let us dive into the list of feature the theme is dressed with :

1. Custom Home Page with
 - Custom image slider
 - Latest Posts Slider (Number of Latest posts setting can be configured via ACP > Settings)
 - Text Ticker
2. Theme UI Control : This is the most improvised version integrated into MyBB so users can have an amazing experience in customizing the layout according to their taste.
 - Custom Background Color Changer (includes 12 predefined colors)
 - Custom Background Pattern Changer (includes 18 predefined Patterns)
 - Custom Background Image Changer(includes 6 predefined images)
 - Custom Theme Width Changer.
3. Powered with Latest Css3 features like Animations, Buttons, Poll Bars, Main Navigation etc.
4. JQuery Tabs, Modal Login Boxes, Custom Search, Menu's etc.
5. Custom Fonts and Icon Fonts Integrated with nearly 99% of MyBB icons replaced with icon fonts, that are subjected to change colors according to theme UI control Options.
- 6.Custom User Profiles with Modern Style.
7. Clean, Elegant, Modern, Light, Minimal Design that suits any type of Forum.
8. Custom editor for New Thread and New reply.
9. Quality support to respond for any issues with the theme.

Thank you bro for your feedback.

Sorry that i could not provide vouch copies.

Indeed this is one well constructed theme, that comes with a custom homepage. I can say my best work till date, since Flatdesire :)

Thanks again

Updated the theme with minor bugfixes, please check the original download package.

PS: dont use leaked or nulled content as you would face lot of trouble from hackers, and you wont get the quality support which we provide, always go for genuine download from our site
