Thread: [New Userbar Set \[Dark Edition\]](#)

FlexiN - August 2, 2014, 2:04 am

Here is a full userbar set I designed with the Pen-tool. It took quite a long time. These Userbars are for one of my customers.

What do you guys think? constructive criticism is welcome ;)

Looks really good to me, i love them!

Griev?us - August 2, 2014, 2:06 am

They look really old styled like the good ol' 2010~2012 that forums used.

Don't take this wrong, I like these!

Are these for this forum or another?

Narrate - August 2, 2014, 10:20 pm

I wouldn't mind these being added at all, much better than our current userbars.

Lots of users are requesting the PSD's to these userbars, but I can't release something that is being bought for by the customer.

However im not home atm, but when I get back I will post some free materials for userbars.
