Thread: [3 Strong Servers Dedicated Fully Spoof | 10TB Traffic| 8GB RAM Core i3 | 1Gbp/s](#)

7H3 3XP3R7 - August 2, 2014, 3:07 am

Hi Guys

So i suffer from many problems for now of internet and family by the way i don't want waste money of my servers so i sell my three High Volume Attack Servers with High Features.

They are Spoofed %100 Allow for DDOS like what i used for my Stresser WrathStresser each Server

with DNS AMP can Output more than 10Gbp/s also with NTP can pass 40Gbp/s to 50Gbp/s.

Features of them :

*CPU : Intel i3-540 Dual Core - 3.06GHz

*Ram : 8GB DDR3 8 X 1333 ECC UDIMM

*Speed : Pure 1Gbp/s

*Hard Drive : 500GB SATA WD5003ABYX

I sell All at once please don't ask for 1 Serve

access servers via Putty & IPMI Too.

Original price for each server From company is 166\$ mean 498\$

Servers still New and i Didn't used them because of My Family problems & Bad internet connection in my city.

My price is only 360 \$ For the 3 Servers Accepting BTC | PM | Paypal For Trusted Users Or you can pay 240 \$ for 2 Servers. [25 days]

My Prices are very good & cheap too.

Private message me for more information.

Speed test of One serve

i think no need proof for speed test those types of
servers i used before for my stresser many users tried
my stresser and they know how hard is hitting.

Code wget http://cachefly.cachefly.net/100mb.testAnd then screenshot the results.

GoPro - August 2, 2014, 3:22 am

still waiting for these results of the speed test, since u said 1Gbps speed.

coolerfarmer - August 2, 2014, 3:23 am

Do it like this:

Code sudo apt-get install python
mkdir /temp

```
cd /temp
wget -O speedtest http://pastebin.com/raw.php?i=UUS0vu36
./speedtest --share
and paste the image link here!
```

Same for me! It's strange that he don't want to provide proof!

GoPro - August 2, 2014, 3:35 am

Yep, he was replying to everyone now he has stopped replying to thread and not showing proof?

7H3 3XP3R7 - August 3, 2014, 10:52 am

Speed test of one server added :)

edit : i have changed price.
