Is it worth giving you a vouch after what you did to me?!

Spoiler ([Click to View](#))

Sorry, that was the other side of me. Here is your vouch, Keep up the good work!

I've seen you working with this application for a very long time now and I really like the design and I am also using your program when I'm bored and have to watch anime ?

- Whats your opinion on the theme?

It looks pretty good. However, it's not your theme but that doesn't matter haha.

- Anything you want me to add?

yeah actually, I want my cookie delivered today by tonight or else you're in deep trouble k?

- Do you watch anime, if so what genre do you watch?

I prefer watching horror/comedy/action/supernatural/blood/mystery.

- Do you prefer Subbed or Dubbed Anime?

Subbed ofc, duh..

- What do you like/dislike about the Anime Streamer?

I like that you coded something that could be useful for people who watch anime. One good thing is that people won't be bothered to have all the advertisement popup while they watch anime which annoying as fuck.

P.S

You owe me a cookie.

TheBarret - August 2, 2014, 8:58 am

Just noticed that the theme code is actually bigger then the client itself...not sure if thats considered efficient.

SIM-1847363 - August 2, 2014, 9:02 am

It be better to not release unfished product, if so, put remarks in the product so the end-user knows stuff ain't done yet.

Nikey646 - August 2, 2014, 9:20 am

Why do all of these type's of applications use WMP? Horrible application to watch anything with...

BTW, the Codec you use quite often goes without updates for long period's of time(From my Expierence and also doesn't come pre-configured for Hi10p, which won't matter if you are streaming .mp4/.flv), and the site you are scrapping for anime is outdated (EG: The anime you searched, Date a Live, has two seasons now...It only showed one...)

Otherwise, nice application beside's those few nitpick's of my which are all personal preference (Except the outdated anime issue)

Otherwise, nice application beside's those few nitpick's of my which are all personal preference (Except the outdated anime issue)Ok Codec,.... ok have your facts and opinions, and if you paid attention that was Dubbed not subbed only the first season of Date a Live was Dubbed and the site isn't outdated or i wouldn't have used it, please know your facts. Next i would have used VLC, like i did in some of my old projects, but personally i prefer WMP

And thanks for your opinion i may have a separate version for VLC, if WMP stops people from using it.

Okay, your blind. You did a Search and it returned both Sub and Dub for Date A Live, but no S2.

SIM-1847363 - August 2, 2014, 9:34 am

(Aug 2, 2014 04:45 PM)xMEOUWrote: [\[CITE\]](#) Thanks for this application looks good and plays good. any new features your planning to implement?Community Recommendations, Favorite Shows/Episodes, Custom Player UI, Fix some of the Common Bugs, And that's about it, if you have any ideas i would love too hear them.

Onin42 - August 3, 2014, 3:41 am

Why all this pink xD ?

Will be great if you could create some kind of favorite and some logs (history etc..) who will save the current anime episode and could tell you when a new episode is online.

Then something in your profile who will tell you what you have seen, how many episodes, how many seasons, how many animes, how many minutes, like anime planet xD (to much work for that application xD)

For my part i have a lot of bugs from my low speed internet. The application take so much time to load and to change pages etc...

For my part i have a lot of bugs from my low speed internet. The application take so much time to load and to change pages etc...Never heard of anime planet, but i just took a look, damn they are good, But i can do How many Animes, Favorites, History & How many minutes. It will come in an update after i fix my main form, all of the controls are gone...

Yui Asuna - August 3, 2014, 6:12 am

In your screenshot, the logo doesn't seem to blend in the header that well, you may want to look into that.

Please make the VLC version, and I'll have a look at it, since WMP sucks...

Btw, any way to get multi-languages sub ? I like my anime subbed in French, like most people would like them in their own language I guess.

SIM-1847363 - August 3, 2014, 8:31 am

Btw, any way to get multi-languages sub ? I like my anime subbed in French, like most people would like them in their own language I guess.For other multi-languages subbed, would be hard, it won't be impossible, but there would be more than one problem, like already subbed anime subtitles would overlap. And yeah the logo is a tad to big.

KFCat - August 16, 2014, 6:34 am

Looks like a nice Program , 10/10 :)
