Thread: [Free PSD to HTML Service and Web Design](#)

Yanille - August 2, 2014, 1:49 pm

Hi there my name is Yanille as seen. So I'm a front-end developer and web designer and I'm in need of projects that I can do and finish to put into my portfolio.

This is for a limited time only I will turn any psd template of a website you like to life.

This means I will be using HTML , CSS and jQuery and if you need anything else like javascript you just need to give me a heads up so to know.

So if you are interested reply here and I will try my best to contact everyone.

A reminder since this is completely free a deadline can not be set since I do have other things to do as well.

Please contact me and include the work you get from here as well as your rates per hour.

I'm looking to hire a few more developers for my company.

I've contacted you and I hope to work with you soon.
Things for now seem to be going well.
