Thread: [Casino script seller \(Project started\)](#)

tzman - May 23, 2010, 3:34 pm

I bought casino script from [HERE](#) for €499.

I have all reseller rights and I can do whatever I want with this script so I decided to make something big.

My plan:

- Create website for selling this script
- Make my own licence system and sell script with cheap licences (about \$25 per licence)
- Redesign default template
- Make and sell addons (games,payment systems...)
- Make and sell templates
- Offer hosting
- Offer Complete Packages (script+template+hosting+domain)

I now there is a lot of work to make all this stuff but I'll try

What do you think about this idea and can I make big money from this ?

Gamblers are everywhere my friend so there's always money to be made.
