Is there any specific reason that you did not put border line of left & right side of progress bar?

Well on the kobo app the progressbar was exactly like this one and I personally think it does fit well with the theme.

But if you want border line on other parts feel free to custom my project :)

Really really much appreciated to hear that from you. As I learned how to code GDI from your SLC theme (which is definitely gorgeous) I also want to thank you :)

And I'm pleased that you like it, really.

+Haze - August 3, 2014, 10:55 am

Sorry I forgot to add a function in my KoboButton. Fixed. Thanks for your comment bro :)

It looks nice, but I hate the ProgressBar. Always use the pace between the border & the actual ProgressBar's progress if you do it on top. Also, the grey color doesn't look nice.

You should make it look like this.

wickedprayer - August 4, 2014, 10:53 am

Really nice work, i'll probably use it ;)

Cynn - *August 4, 2014, 3:41 pm*
