Thread: [\[tut\]HOW TO MAKE trojan almost FUD easly -PART 2 \[tut\]](#)

Breakbot - May 23, 2010, 4:38 pm

hey guys it's me again with another very easy way to crypt your shit :D

this was my last tutorial about crypting

<https://hackforums.net/showthread.php?tid=277046>

we had some problemes finding a full version of the software

but this time we have another way to crypt and the results are very good .?

test with :

bifrost

poison ivy

didn't test with other rats

let's start .

first if you don't have NET framework please download it

Quote:

<http://download.microsoft.com/download/7/0/3/703455ee-a747-4cc8-bd3e-98a615c3aedb/dotNetFx35setup.exe>

AND now the tutorial :

we gonna use xenocode postbuild 2010

theres a lot of full cracked version google it .

sorry but as i already said i'm not giving any download link anymore?

first click add and add your server

[img]http://img84.imageshack.us/img84/454/frm00002t.jpg[/img]

--> presets : aggressive for managed executables applications

[img]http://img227.imageshack.us/img227/7840/frm00003.jpg[/img]

apply then build application

[img]http://img218.imageshack.us/img218/7386/frm00004.jpg[/img]

select directory

[img]http://img59.imageshack.us/img59/8111/frm00005.jpg[/img]

and finally OK !

[img]http://img204.imageshack.us/img204/47/frm00006w.jpg[/img]

done ?

scan results ;

before

<http://img203.imageshack.us/img203/5867/17636647.jpg>

after

<http://img7.imageshack.us/img7/4620/59098956.jpg>

screens belong to desert scorpion .

ps : be sure to find a cracked version so you can avoid the limitations .?

please post a comment if you like my tutorial .

frogsyy - May 23, 2010, 10:50 pm

thanks for the tut im going to try to find xenocode

Joost - May 23, 2010, 11:14 pm

Looks very promising! I just hope it won't corrupt a Cybergate server, though.. I guess testing is the way to find out - dangit I hate testing a RAT ;)

If anyone has any results on this, sharing is caring

-mothered- - May 24, 2010, 6:39 am

Okay well this is very much self-explanatory, but nonetheless, pretty informative for those who are new to the methodology of the crypting process. Having said that, I haven't utilized xenocode, so I'll give this a crack and see the comparison to my crypting procedures.

Many thanks for the tut mate :)

Raphant - May 24, 2010, 7:19 am

The executive could not be processed because the application uses Native Thread Local Storage o.O. Dunno if it's my framework version or the way I program the server.

MarV™ - May 24, 2010, 8:52 am

the tut is very detailed !

nice job , keep up the good work

Breakbot - May 24, 2010, 9:07 am

thanks for comments

screwy you try to crypt what kind of servers ?

i'm using bifrost+poison ivy it works 100% 3/20 1 week now and still 80% UD

AtHackX - May 24, 2010, 9:10 am

Nice tut thank you, searching a crack right now ...

EDIT : It worked

4/19 To => 0/19

Breakbot - May 24, 2010, 10:33 am

I'm getting the same as screwy, on a Cybergate server. Any ideas?

samuraix - May 25, 2010, 1:24 am

How to active it with the code?

It is not working.

MORPH-182 - May 25, 2010, 3:18 am

Awesome tutorial!!! Thanks heaps for the share, I like your work.

-mothered- - May 25, 2010, 3:48 am

Okay this Is all up and running without errors. I particularly like It's ease of use and overall range of features/options.

Now, I'll crypt a few files and see what It has to offer.

Cheers :)

Breakbot - May 25, 2010, 5:06 am

thanks

samuraix if the licence doesn't work please try to find a new one (google it)

for those who say that it doesn't work with cybergate , well i didn't try with this rat cuz i'm not using it , but works 100% with bifrost . poison ivy ..

MaGiki - May 26, 2010, 2:25 pm

Thanks for your tutorial But for 64 bit that dont work ??

Breakbot - May 29, 2010, 12:28 pm

Yes it works with 32 / 64 tested 100%

Raphant - May 30, 2010, 9:07 pm

Casarat, you tested it with Cybergate? Has anybody tested it with Cybergate? Cause it won't work for me.

bhkfsg - May 31, 2010, 1:18 am

Nice one:-):-) keep them coming

Nice one:-):-) keep them coming

Nice one:-):-) keep them coming

zoh - May 31, 2010, 4:18 am

it makes it Fud, but corrupts my server =/

it doesn't work after that

(May 30, 2010 09:07 PM)Screwly Wrote: [\[CITE\]](#) Casarat, you tested it with Cybergate? Has anybody tested it with Cybergate? Cause it won't work for me.

yes, i did. Doesn't work for me too ?

whyk007 - May 31, 2010, 5:26 am

i will like to know if this method is 100 percent FUD.. and am having troubles getting a cracked xenocode

vienquay - June 1, 2010, 5:14 am

Doesn't work with Spy-Net. :]

Breakbot - June 2, 2010, 9:23 am

(May 30, 2010 09:07 PM)Screwly Wrote: [\[CITE\]](#) Casarat, you tested it with Cybergate? Has anybody tested it with Cybergate? Cause it won't work for me.

no? , tested with bifrost and poison ivy rat works fine

not FUD but UD 2/21

kingzaib - June 3, 2010, 5:11 am

where to download xenocode plzz

Breakbot - June 3, 2010, 3:21 pm

@king

google is your friend mate .

you can find xenocode evrywhere (warez , torrent , emule ..)

Lt Mays - June 11, 2010, 11:44 am

this doesnt work with any other rat other than the ones you claim.. it wont let you add any server files

camelCase - June 11, 2010, 11:53 am

Making software "almost" fud, is like being almost not pregnant. You're still pregnant.

Victim - June 14, 2010, 3:13 pm

(Jun 11, 2010 11:53 AM)camelCase Wrote: [\[CITE\]](#) Making software "almost" fud, is like being almost not pregnant. You're still pregnant.

Not really. Most of the time, Almost FUD is fine, assuming your victim doesn't have every single Anti-Virus installed.

Breakbot - June 14, 2010, 4:59 pm

(Jun 11, 2010 11:44 AM)Lt Mays Wrote: [\[CITE\]](#) this doesnt work with any other rat other than the ones you claim.. it wont let you add any server files
use my other tutorial (link in my signature)

eXeSoul™ - June 15, 2010, 1:15 am

>> Nice one mate :-)

after this tut you can do haxing EOF.

Breakbot - June 15, 2010, 5:44 am

play with hex values , change icon may work too

sh2rt

Lukec12 - June 24, 2010, 9:43 pm

I am going to give this a shot. Thank you for this tut.

emes3k - June 24, 2010, 10:16 pm

Thank you for tutorial:) But it isn't fud ;)

kombajnik - June 25, 2010, 10:23 am

Hmm i have a problem ;s

look

[img]http://img.nopaste.pl/upload/error_4c24e62fb8c20.gif[/img]

how to fix it?

Breakbot - June 25, 2010, 3:56 pm

(Jun 24, 2010 10:16 PM)emes3k Wrote: [\[CITE\]](#) Thank you for tutorial:) But it isn't fud ;)
emes3k read the thread's title :

it's almost FUD not FUD ;)

thank you

kombajnik - June 25, 2010, 5:02 pm

Can any1 help me ;-P ? @2x up :))

azerty39 - June 26, 2010, 9:10 am

Hello!

Just to say that with Xenocode 2010 profesional edition it work too.

I have try with a apocalypse server and it works

I have 3/19:

<http://img718.imageshack.us/img718/8800/kirac.png>

Thanks a lot for this method ;)

And I want to know if I crypt/bind/change icon after that, can I have 0/19??

Thanks you

Breakbot - June 27, 2010, 6:02 am

yeah maybe , depends of what rat you're using

azerty39 - July 6, 2010, 2:26 am

I have try with Crypting + Protecting but after server don't work :/

Any solution??

Thanks

Because with this I have 0/16 so I want IT!! 8)

Breakbot - July 6, 2010, 10:34 am

maybe the crypted server didnt work after usin this method , use another crypter maybe it gonna work **good luck

PerfectRandomness - July 6, 2010, 12:15 pm

so, does it just not work with cybergate?

Robbyringer - July 6, 2010, 12:42 pm

This is a great tutorial...good work.

Breakbot - July 6, 2010, 1:18 pm

you're welcome

ps : please take a look at my other tutorial :D

casarat

azerty39 - July 6, 2010, 1:45 pm

(Jul 6, 2010 10:34 AM)casarat Wrote: [\[CITE\]](#) maybe the crypted server didnt work after usin this method , use another crypter maybe it gonna work **good luck

Yes I have doing test (again ^^)

And I have see that it's my crypter who block my server, but the 0/16 is runtime too??

Thanks to you ;)

(Jun 25, 2010 10:23 AM)kombajnik Wrote: [\[CITE\]](#) Hmm i have a problem ;s

look

[img]http://img.nopaste.pl/upload/error_4c24e62fb8c20.gif[/img]

how to fix it?

I had the same, to fix that, crypt your server before and protect your server after ;)

Florinel - July 6, 2010, 5:21 pm

From where i can download your program (from the pictures) plz...

Breakbot - July 7, 2010, 6:22 am

FLORINEL , it's not hard to find it , google it ;D

azerty39 - July 8, 2010, 4:10 am

I have trying some crypter but every time I protect my server --> not working, so I think that crypt + protect don't work :/

azerty39 - July 8, 2010, 4:11 am

I have trying some crypter but every time I protect my server --> not working, so I think that crypt + protect don't work :/

Breakbot - July 8, 2010, 6:15 am

don't double post please ,
test with the other tutorial i've made .

SpriteZ - July 10, 2010, 8:13 am

Guys try this: <http://cracks.me.uk/?string=xenocode>

Haven't tested because I'm not working on a RAT atm.

azerty39 - July 10, 2010, 8:35 am

(Jul 8, 2010 06:15 AM)casarat Wrote: [\[CITE\]](#) don't double post please ,
test with the other tutorial i've made .
Sorry for double post it was a bug ^^

I have try with your other tut but I have a message error who say that my crypted server is incompatible...

Montana" - July 10, 2010, 8:58 am

Nice tutorial, simple though.

Breakbot - July 10, 2010, 12:15 pm

thank you !

casaratcasarat

Fallenbot - July 10, 2010, 1:31 pm

Should i say that this is one of the best methods/tutorials ever..?!
Thanks for sharing

If anyone want a full version then PM me..
P.S You must be leet or uber.

lolsmileyface - July 10, 2010, 2:32 pm

Thanks, this will help a lot since my trojans always get detected.

flamereaper - July 19, 2010, 10:07 am

hmm your tutorials are getting better..thnx

Breakbot - July 20, 2010, 1:54 pm

thank you , soon more tutorials .

myttarn - August 15, 2010, 6:55 am

nice TUT! works great!!

tooo shooort

earlysound - August 15, 2010, 7:47 am

That was a great tutorial, managed to send out RATs without detection.

acamlad - August 15, 2010, 2:33 pm

seemed to work 100% with Cybergate serve

scanned with novirusthanks and came back CLEAN

until i sent server to over 10 people and no victims anyone else had this ?

Im Posh No Wait Nigga - August 15, 2010, 2:48 pm

Thanks MessageTS MTooS MTShort

christiano - August 16, 2010, 7:34 am

bro the license is not working for me

Fortified - August 16, 2010, 10:59 am

Very informative, good TuT keep it up mate :)

oetschi - August 16, 2010, 12:18 pm

please dont call this tutorial "crypting". This has nothing to do with crypting techniques. Thats just open a crappy tool and click the "Protect" Button.

See yourself as Warned ?

acamlad - August 16, 2010, 2:19 pm

(Aug 16, 2010 07:34 AM)christiano Wrote: [\[CITE\]](#) bro the license is not working for me if you download from there site its a newer version (8.0.1135) and that license dont work.

that license works with v8.0.1112 so try and find a mirror for that on google :)

Breakbot - August 16, 2010, 2:40 pm

OETESHI Who the fuck said that it was crypting . go learn to read you fucking morron .

ahsanciit - August 16, 2010, 3:23 pm

giv me download link dnt google it...???

Elya - August 17, 2010, 8:51 am

And it does not work with CyberGate? Think I have to try another RAT...

But the tutorial is nice. Keep it up.

hellrell - August 18, 2010, 1:07 am

good shyt

bump this ..testin out different rats now since i heard wont work with cyber

christiano - August 26, 2010, 4:17 am

will my crypted stealer work on those computers who dont hv .net installed

m4lebolgi4 - October 3, 2010, 2:17 pm

Thanks man - this gives me some good ideas on crypting.

amlac09 - October 3, 2010, 3:50 pm

ill try it in stealer hope it wOrks thanks mate

Mint - October 10, 2010, 1:18 pm

i have a cracked version and whenever i try with DarkComet or Cybergate i get this error:

[IMG]<http://img338.imageshack.us/img338/4562/xenode.th.jpg>[IMG]

what does it mean? Can i do something about it?

Breakbot - October 11, 2010, 7:43 am

THis one work only with Bifrost / poison-ivy and stealers

try one of my other Methods ,

Miami Weiss - October 13, 2010, 6:21 pm

Download: http://#.com/#!download|730|313404317|Xenocode_Postbuild_2010_for_.NET.rar|10216

Scan yourself.

License: http://www.norkoo.com/show/tech/asp_net_2_0/aecakhjjakiiadkaifdkecikcgcf.aspx (Bottom of page)

Breakbot - October 15, 2010, 6:38 am

maimi weiss please delete the link you posted i don't want members to get infected because of my thread .

casarat

rickiross - December 1, 2010, 12:10 pm

god damn shi"... kaspersky cant find it but . im givin it up. i tryed every method., but Nothing of them worked. even this fuck###ng mole aspack and xenocode. kaspersky saivs its clean but Avira Antivir did find it. and if i start it the server crashes... dont know what to do guys

Judenbuche - January 10, 2011, 2:50 pm

Thank you, works great in combination with crypters. Got 1/16 with Darkcomet :)

Breakbot - January 10, 2011, 3:52 pm

no problem judebburch :)

glad you like it

Beast Mode - January 10, 2011, 4:46 pm

Would this work with DDoSeR?

MrHacker - January 11, 2011, 1:43 pm

hey what about keyloggers? would this work or not

Breakbot - January 11, 2011, 2:07 pm

how about to give it a try and stfu ? dude i'm sick of tired to these kind of question

willbebacksoon - January 12, 2011, 7:49 am

Awesome Tutorial thanx :-)

scyther123 - January 12, 2011, 8:01 am

nyc tutorial gona try it ;)

OnlyMeDontPanic - January 12, 2011, 8:40 am

Great TuT will give it try in a bit as I downloaded

Xenocode.Virtual.Application.Studio.2010.ISV.Edition (Now called Spoon)

by accident. On a plus side I decided to see what I had downloaded as I have to wait an hour to download from # again lol and it turns out "I think" this software is used to virtualize executables eliminating the need to install plus the user needing .net installed on their computer is not an issue.
:O

So if im right in assuming that the software you have put forward in conjunction with the simular software I accidently dowloaded should make a pretty dam failsafe infection as I believe a number of my rat installs fail due to the user not having dot net...

Hopefully someone more intellectual than me can look into this, I Sir Am EXITED Thanks

Goooofy - January 12, 2011, 9:35 am

i am new here and i want to know helly HELLO

Niksutin - January 12, 2011, 9:47 am

nice tut, learned alot things

SIM-135152 - January 12, 2011, 10:21 am

thank you man

this is a great tut with the three parts i like them

PongViking - January 12, 2011, 11:39 am

Great tutorial breakbot, but this doesnt work for me anymore !

I crypted my Poison Ivy server today with this method, and it got 8/16 !

I think its useless now

Breakbot - January 12, 2011, 1:59 pm

jameshacker it's normal when it gets very public x)

will post new tutorials soon

Pixelblocker - February 12, 2011, 6:15 am

I like this but i cant find a serial or a crack for the program-.-

But thanks for the tut!

mixermassiv - February 12, 2011, 7:43 am

not working for me any way nice tut

Stenography - February 12, 2011, 8:16 am

can u please PM me With Download Link ?

Rockwings00 - February 12, 2011, 8:25 am

lly.. No Homo. 3/47

Thanks brah

Breakbot - February 12, 2011, 8:42 am

no problem . glad it worked for members :)

Stone_FREE_ - February 15, 2011, 1:34 am

According to me, this method only "protect" the file in scantime. But when it open the file, the server is detected with any antivirus, so it is not very useful. Can someone check this out?

asoo420 - February 15, 2011, 2:59 am

searching a crack right now ..

edit thanx it worked :D

Matthew 6:33 - February 15, 2011, 11:05 am

YEES dud you are the fucking king now i can refud my stubs yeees woow vouch for you

H4ckAttH4ck - February 15, 2011, 10:21 pm

very nice update in your previous tut ...Keep up the good work and thanx for sharing Bro.???

sanboju - February 17, 2011, 10:48 pm

please post a download link for crack or pm me need it so badly!

jespervdk - February 19, 2011, 8:13 am

by enter the server.exe

you mean ur keylogger right?

the program if they run it , the get infetecd right?

nice tut man peace out
