Thread: [FindTheirIp.com|FREE Skype Resolver|Fast|](#)

Drizzy?? - August 4, 2014, 1:16 am

Hey guys! I just finished setting up my new Skype resolver, [FindTheirIp.com](#)

Obviously, the design looks pretty bad, so I'm waiting for the web designer to fix it up, but it is still FULLY functional!

FindTheirIp works on both the latest version of Skype, AND the new Skype beta!

As of right now, blacklisting / api access is not automatic, so if you'd like to purchase either of these, please add me on Skype @drizzy788

Thanks guys! And happy resolving!

I've tried a few usernames and both showed up as IP Not Found.

Which usernames are you trying? I'll look into it.

Tried resolving myself and it showed a Microsoft cached IP. I don't think this works with beta.

Do you mind PMing or posting your skype username? Thanks.

TheyCallMeFox - August 5, 2014, 5:14 am

The skype beta update killed most resolvers lol

StyleRxd - August 5, 2014, 6:22 am

Cuzz of the exploit has been patched by Skype Providers, we have to wait until the owner of SpeedResolve update his API

Vicellus Drum - August 5, 2014, 6:25 am

Why is everyone using Abrasivecraft's stub? It's so inaccurate, it came up with a random IP for my

username. ?

Drizzy?? - *August 5, 2014, 6:41 am*

Please hang tight guys while we try to fix a work around with the new update!
