Thread: [Teamviewer i want them not to be able to control mouse](#)

Xete - August 4, 2014, 3:56 am

Hello someone tried to scam me once he said he was going to put psc into on my google after he was on my teamviewer then so he could trust me he traded with himself he said it i let him in cuz i was stupid then somehow i wasnt able to control my mouse he controlled everything went to steam was going to trade with himself and take all my items but i shut down my pc fast! so he wasnt able to trade :d

Im looking for something like this so i found someone tell him to trade trough teamviewer or show me the items! but then i use this so he cant control hes mouse and take all hes stuff! :D

I would appreciate it! :D

wat.

I do not understand your Question(s). Please improve your grammar in this Thread.

Kind regards,

KyoZ

When you connect, there is a menu in the bottom right. There should be a mouse pointer with a blue box. If you click that, they won;t have access, only watch.

You need to go to your settings and set everything on high secure. I also ever got this.

a rat? stands for "remote administration tool" look here at hackforums.
lots of newbie tutorails.
