I am the co-owner and head of KnightVPN. If you have any question, post in this thread instead of PMing us. If you really need to PM us for whatever reason, PM me instead of Happeh, and you will get a faster response.

Thank you

Your DDoS protected services and normal services are of the same pricing, o-O

Depends on how you define "normal". We only sell DDoS Protected services and offshore ones.

potatopete54 - August 5, 2014, 7:18 am

Normal as in your offshore ones. So, do you give users a trial and allow them to test around and then review about PrinceVPS?

VRUMM - August 5, 2014, 7:19 am

(Aug 5, 2014 07:18 AM)Argentium Wrote: [\[CITE\]](#) Normal as in your offshore ones. So, do you give users a trial and allow them to test around and then review about PrinceVPS?

It is not the same with KnightVPN where we can give trials freely. We don't have a system set up for that yet.

Happeh - August 5, 2014, 10:24 am

Thank you for the kind vouches people. :D

VRUMM - August 5, 2014, 10:25 am

Putting it here that we don't allow our servers to be used for ddos.

.Matt - August 5, 2014, 11:06 am

Are you doing any discounts or anything as 20\$ per month for 1 core and 1GB ram is very steep.

Our monthly costs will double if we provide windows VPS right now. We have to wait 1-2 more months before we can offer it.

I'm going to have to purchase this because I love KnightVPN so much.

Is there anyway to fake a graphics card on this VPN so I can use game bots?

(not for league refs for any one who looks at my post thinking i'm trying to bot League of legends on a VPS)

you need a KVM vps for this, not a OpenVZ one.

You're just reselling OVH like 100 other people on here. Not offshore.

Hi,

I need to contract a pack to use just one software. A traffic exchange as the Hitleap one.

I should go for the lowest package, not?

Which one could you recommend me?

What kind of support do you offer? As i have 0 knowledge of how to install software and configure the server.

Thanks
