The Brotherhood Video Editing Student Program[Video:
<https://www.youtube.com/watch?v=IfFaSdMfZ94>]

Want to learn how to edit like this?! The Brotherhood VFX Student program allows uneducated members of HackForums to advance in the field of Video Editing. We have assignments that teach one the fundamentals as well as inspire them to strive to become a fantastic video editor, all it takes is some work.

We have no requirements, other than your will to learn how to edit videos like the video above. Please note that gaming edits are not the only thing that we specialize in, you can learn a large variety of categories to edit to. Dgb1tch as well as myself are mentoring all students enrolled in this program and love to do so, there are no questions that are too simple for us to answer.

Please fill out this application if you are interested in joining:

Code [list]

[*]Why are you interested in Video Editing in particular?:

[*]Link previous work (if none, link the edit you want to strive to achieve):

[*]What level of video editing do you want to reach?(link video):

[*]Why should we choose you?:

[/list]

Good luck to all applicants, we look forward to seeing future video editors!

dgb1tch - August 4, 2014, 3:45 pm

Good luck to everyone, we only want members who are serious about this.

Jhené Aiko - August 4, 2014, 4:03 pm

Why are you interested in Video Editing in particular?: I took media & photography in college and would like to learn how to professionally edit videos.

Link previous work (if none, link the edit you want to strive to achieve):

<https://www.youtube.com/watch?v=eDtXHMx2e0c&list=UUzBQv4E25jcUgO8cWkLsNAw> < I will be editing music videos so I would like to be able to edit and achieve something like this where I can record multiple clips and sync them in time with the music and add effects etc.

What level of video editing do you want to reach?(link video): Same as above.

Why should we choose you?: I am available all the time and will be dedicated to learn, Media is my career path and learning to edit will help me out alot in the future! I have a little experience with Final Cut Pro and have around £5k worth of Final Cut Effects and flares which I could share with other members if they need them.

Aurora - August 4, 2014, 4:17 pm

Why are you interested in Video Editing in particular?: I'm interested in video editing because of the amazing things you can do to enhance a video. I find it somewhat very cool to see the different effects in a video.

Link previous work (if none, link the edit you want to strive to achieve): I made this video about a year ago [<https://www.youtube.com/watch?v=PhesKmjua-o>] using After Effects but after that I kind of quit video editing because of my poor editing skills. I got very demotivated, but now I'm motivated than ever to learn again and learn how to improve.

What level of video editing do you want to reach?(link video): [<https://www.youtube.com/watch?v=xelGdn2gpqo>]

Why should we choose you?: I'm very eager to learn and improve my video editing skills. I'd like to be your student and learn more on how to improve and be better at video editing. I have time in my day that I could be using to learn things like this.

Jay? - August 4, 2014, 4:23 pm

Why are you interested in Video Editing in particular?: I have always liked AMV's (Anime Music Videos) and tried to make my own a few month's ago. Let's just say it turned out like shit, and because I had no one to help me or teach me or give me any type of real focus I sort of just gave up on it. I would love to get back into this as creating something such as this after working hard on it is extremely satisfying. Being able to tell a story within a short time frame and make the work visually flow as the story progresses is an art that I personally enjoy.

Link previous work (if none, link the edit you want to strive to achieve): I cannot link the anime music video I did as I deleted the youtube I had associated with the video and channel. However, I can link you to AMV's that are some of my favorite.

[RadioAshkun](#)

[Into the Labyrinth](#)

[Animegraphy](#)

[The Boy Who Murdered Love](#)

What level of video editing do you want to reach?(link video): Hopefully with your help and my own research and and devotion to editing I can reach something on the level of these videos:

[Pandora](#)

[Final Spark](#)

[Demonic Dreams](#)

[Annihilation](#)

Why should we choose you?: I am an extremely hard worker who has the time to dedicate himself to learning. I am open and easy to work with. I take criticism of all kinds and use it to better myself. I have some experience in both VFX and graphic editing. I offer a unique look and experience on video editing in the sense that I will be working with animation. I am online everyday, am easy to communicate with, and will do everything in my power to learn and utilize the resources I will be provided by experienced VFX artists such as yourselves. I cannot say that I am the best at what I do, but I can say I am one of the hardest workers you will meet. If given the opportunity I hope to

show that. Thank you.

Glad to see the recruitment thread up and running.

I highly recommend you put a lot of effort into your application.

Good Luck

Why are you interested in Video Editing in particular?:I have always thought that it would be awesome to animate. Creating action with a computer has always made something click for me. Editing also makes this happen. I also take a class in school where we work with video for a news show. Video and working with it is very interesting for me. I am also starting to go around in the VFX section and look at the threads to get an idea of VFX.

Link previous work (if none, link the edit you want to strive to achieve): No public ones, they are all stored in school servers. I created some rudimentary animated gifs, by editing one frame at a time. I also, cut video and worked with a green screen. Nothing fancy.

What level of video editing do you want to reach?(link video):

www.youtube.com/watch?v=dqZQVxX3HBk

www.youtube.com/watch?v=WLxpHF0Y-2

www.youtube.com/watch?v=tOWI2lrwm-Q

Just short animations, and good edits. I also like movie SFX, but I couldn't get examples of them. Just general SFX. For example, explosions, fog, etc. Though Star Trek phaser blasts appealed to me! :D

Why should we choose you?:I will be a very dedicated student. I love to learn new things, and to explore technology and art. I also wish to teach what I learn to others, and spread knowledge. I am also very eager, and happy to learn everything and anything you can teach me! Finally, video editing will be very helpful with everything I do. In the HF radio I am making, I could create cool videos to go with the broadcasts!

Thank You for considering my application! I appreciate you taking the time to do this!

• Why are you interested in Video Editing in particular?:

I've been interested in video editing for quite a long time now, my interest in it began when I started

playing cod4 competitively on the PC, obviously. I'm also very interested in it in general , I think it would be a great thing to learn and is a great skill. It's not only gaming frags I'm interested in I'm also interested in stuff like intros, regular editing etc.

- Link previous work (if none, link the edit you want to strive to achieve):

I don't have any previous work, as I stated above I've never had the resources to learn this skill properly. The edit level I strive to achieve is basically in the videos I listed in the section below this paragraph.

- What level of video editing do you want to reach?(link video):

Maybe it's optimistic, but you can never stop learning.

<http://youtu.be/ueAKU6LrPpo>

http://youtu.be/qhYYOIOr2_M

- Why should we choose you?:

I think you should choose me because I have a genuine interest in video editing, graphics and the like as I stated above in the first paragraph. I'm a student that is willing to learn new skills and work very hard at whatever it is. I feel that I would fit right in with the group and would overall be an asset. I could share my skills with others interested in the group as well.

I'm a dedicated student who will finish what I start. I will do whatever is needed to complete the task at hand. I know I'm not YOUR best choice, but you are mine. Please guide me, and I'll commit to whatever you need. Thanks for reading my application!

Evident - August 5, 2014, 9:38 am

Submission by Evident // August 5, 2014

I have been making content on YouTube since early 2009. Back then I would make game play videos of popular online games. In 2010 I moved on from the game play side of content creation to film and video. I started in the Windows XP version of Movie Maker, and was working with and taking full advantage of that till about the end of 2012. I stretched that program to the max, I would code plugins in XML that I could later use in the simple time line. I remember how I made one that added a watermark to my videos, and then also found one online and then later changed it a bit that could key a background. It was terrible, but still I took that program to the max. I would produce and upload original sketches every Saturday. Later on in 2011, I started another series of mine, titled 'Ask Ty!' which is a Q&A series which still runs to this day. Those would go up the first Wednesday of every month, but now have a more frequent schedule. The point is, from 2010-present day, I have been interested in film, video editing, and directing. I'm a senior in high school right now, and the top

in my class for our communications course. I went to the Student Television Network Convention 2014 this past March, which is a communications convention and competition where the top 10 students in our school were picked to compete. We got 3 awards; second place in the nation for our silent short film, top 5 in the nation for our music video, and then top 5 for our short film. I also plan on pursuing film/video in college next year as my major. I am a passionate video creator eager to always enhance my skills.

All of my more recent work is directly linked on my website, www.TylerSaari.Net. All other work of mine is on my YouTube channel which you can navigate to by clicking the button titled, "My YouTube Channel" or by going to www.YouTube.com/StupidComedyCenter.

As I said before, I am mainly just interested in enhancing my skills and getting better. I don't specifically have an ending level, I just want to learn more about what I love to do, while at the same time getting to communicate to people who have the same passion as I do.

You should choose me because I am a hardworking, passionate content producer who is determined to get better at what I love to do. I have years of experience, as well as the tools required at my disposal. As well, I am one of the top videographers/video editors in my school. I plan on going into this field in a year when I am off to college and getting work, so I am dedicated.

To finish off, I am very glad you are considering my application, and I look forward to a response. If you have any questions at all, please feel free to either PM me here on Hack Forums, or go to my website and in the lower right click the email icon to send me an email with the subject, "The Brotherhood VFX App". Thank you for your time.

Why are you interested in Video Editing in particular?:

I've always taken an interest into video effects since I first watched a few frag videos on youtube. The effect of a well edited video with a great soundtrack really appealed to me as a viewer and I've always wanted to try my hand at creating the same effect.

What level of video editing do you want to reach?(link video):

<https://www.youtube.com/watch?v=IAu4PhGtyXc>

Why should we choose you?:

I think the main reason is the underlying passion I have towards video editing. Sometimes when I listen to music I always imagine a scene that goes along with it and I feel like I have the imagination and drive to create something, but I just never got around to doing it and this seems like the perfect opportunity.

Other than that, I feel like I always drive to push out the highest quality of work from myself, and this is something that I can channel that into. I don't plan on doing this for the sake of doing it, I really do plan to learn and create the best product that I can.

Wolfric - August 6, 2014, 3:11 pm

Why are you interested in Video Editing in particular?:

The main reason I am into Video Editing (or wanting to get into video editing, is what I should say,) is because of my Grandfather. Ever since I was a younger age and would visit my grandparents house, I would walk downstairs to his "lair" where he would always be editing video, etc. Not only that, but on every special occasion I could think of he would have his camera out. He used to want to be a director, but settled with working on the railroad and making short movies in his off time. Around 3 years ago, he contracted lung cancer that later spread throughout his body and unfortunately it was his time to leave this earth. I wish to continue his legacy, even if it wasn't the greatest, and learn some things myself as I am very interested in video editing and what you could do with it. One of his videos actually achieved a very cool feat. We were the first people to ride the roller coaster Steel Hog, located at Indiana Beach, pictured here: Spoiler ([Click to View](#)) We were able to do this because we made a video showing the Steel Hog and advertising it, winning the video contest. I would really like to create work that he would be proud of today, if he was still here.

Link previous work (if none, link the edit you want to strive to achieve):

<https://www.youtube.com/watch?v=4SNz06LPyEY> This is basically a link of what I would like to strive to achieve, I really like the style of editing the author used.

What level of video editing do you want to reach?(link video):

Here are some examples of what I would like to achieve:

<https://www.youtube.com/watch?v=y76EYv9MoRc>

<https://www.youtube.com/watch?v=LahBFh5suVA> (I particularly like this one.)

I also really enjoy actual film VFX, and not just video game editing. For example:

https://www.youtube.com/watch?v=GaVxulsgH_A

<https://www.youtube.com/watch?v=-SEuoEJkODE>

Why should we choose you?:

Persistence, Dedication, and Willingness are some of the traits that I will show whilst being taught by Brotherhood. I am extremely interested in video editing and am willing to put forward 110% in order to achieve what I have always wanted. Thank you for considering.

Why are you interested in Video Editing in particular?:

I find Video Editing exciting and challenging, not that it's hard or easy, but the point of extent that you are trying to create a masterpiece, the time it takes to edit the video using Sony Vegas, the time to record the video and the time to render the video is all worth it. I am a marketer here on HF, but Video Editing is one of the hobbies I do outside of HF.

What do you strive to achieve?:

I try to not upload my works to YT, I usually get copyright banned for no reasons, I just keep local copies of my work, if you wish to take a look at it, I'll send you one of my copies, locally I make Video Edits for businesses and schools nearby who are trying to promote or entertain an issue.

When I first started League of Legends 2 years ago, this video came out, I was inspired even until now, trying to create samples of something like it, I hope I get inspired by you to make this eventually >3

Why should we choose you?:

Besides having a hobby of VFX, I am also a marketer and a servicer, I can promote anything with ease. I have lots of time in VFX, I don't mind dedicating time into it. If you choose me, thank you and I hope I wish myself the best!

Recruitment ends on the 20th, if PMs were sent out.. it would be in secrecy and you would not be notified. The members that made it will be posted as a response to this thread upon recruitment closure date.

You are able to edit your post at any time, remember to keep it true to you.. but we are also looking for people who are showing us their true feelings about this subject, not just saying things to get into the group. This is the second recruitment for this sector, due to members being inactive and not really caring. This WILL NOT be tolerated, if you are applying to the sector, it is going to be just as much time tasking as any other sector except your work is presented through your edits.

Regards.

Because I'll do it. I'm not begging for this, there are probably people who genuinely need or want it much more than myself. First off, I would love to be able to make up some fancy edits fo youtubers. Mainly around montages and shots of something awesome happening. I would like to stick to music and gaming videos, but I'm open to most of what you may offer to teach. I love to make stuff better than they were before and video editing to me is all about that. It's not just videos or anything graphical, I enjoy making things better all over the place. Although I may not be good in one place, with the proper training, I believe I can be good at anything.

I would like to achieve something similar to this.

What level of video editing do you want to reach?(link video):

Look above. ^

Why should we choose you?:

Because I have faith that you and dgb1tch can teach me well. I hope to be dedicated to VFX after you train me. I believe I am trustworthy and loyal. If I do not get accepted, I will simply move on to another method. Maybe talk to someone who knows alot about VFX. Anyway, hope you guys consider me. Have fun!

Good luck to all who enter!

Why are you interested in Video Editing in particular?:

I'm interested in picking up Video Editing as a skill because a lot of this generations content is being presented through the medium of video, and being able to create videos that are in another league as everybody else creating videos will obviously make people more eager to watch whatever content I decide to put out in the future. In my opinion being able to edit a video to the point were it is clean and enjoyable to watch is an extremely useful skill in this media heavy generation. Another thing that has me interested in video editing is that my friends and I(in real life) have been talking about creating short movies and or comedy sketches for fun and having somebody that knows how to properly edit videos would be an integral skill in making our talks reality.

Link previous work (if none, link the edit you want to strive to achieve):

I've no previous work to offer so would like to start off with something(seemingly) basic like this video: <https://www.youtube.com/watch?v=PJQefyZxGsE>. Eventually I'd like to make videos like these:

<https://www.youtube.com/watch?v=wamTzu5AVI8&list=UUzWQg904Rvxn6km-2Q1X92g&index=17>

What level of video editing do you want to reach?(link video):

the editing in my opinion, is superb and if you could help me go from zero to hero(that video) in a sense I would be truly grateful. I'd like to learn everything that you see in that last video and some techniques for editing and cleaning up real life videos such as the parkour clip to make a seamless, clean and enjoyable viewing experience for whoever is watching my videos. I want somebody watching an edit that I made to leave the viewing experience thinking that it was amazing, but not exhausting to watch. I'd also like to be able to make videos that serve as a visual aid for presenting information like so:

Why should we choose you?:

My activity on this forum may not display such as I've just recently started to become active, but when I set a goal to learn a certain skill or complete a certain action I will loose sleep in my attempt to reach the place that I want to get too. I recently started learning Japanese and there have been times were I would stay up until daylight the next day studying Japanese because my drive to learn the language is so intense. You should choose me because I plan to bring that same unshakable drive to the table when and if you choose me as one of your students. I will work on this until I reach a level that is above the level shown in the video I linked in the previous section.

Why are you interested in Video Editing in particular?: I've always taken an interest towards video editing. It's more like a helpful tool nowadays to me, since many of my customers for web-designing often ask for a video done. Which sadly i'm never able to provide, hopefully with the opportunity I'll be able to plus I find it fun editing things.

Link previous work (if none, link the edit you want to strive to achieve): None mostly private school work

What level of video editing do you want to reach?(link video): I wish to excel further then these guys or even come close:
