Thread: [a swf file inside a exe, how to extract it?](#)

thebinweevilsplayer - August 5, 2014, 7:58 am

Basically I have this exe file right, and whenever I go on it it's a swf file right, but I can decompile the file or anything because it's exe, and whenever I change the file extension from exe to swf the swf doesn't load up. So my question is how can I extract that swf file how can I get it so I can decompile the shit?

Thanks. :)

DpzFAsq4UEK8 - August 5, 2014, 8:05 am

Post the .exe file here ;)

Also, wrong section.

This.

Seems idiot but are you able to extract that .exe with 7zip or WinRAR ?

thebinweevilsplayer - August 5, 2014, 8:14 am

The link is <https://mega.co.nz/#!EVIDRbqA!bymo8-L7qiQcROaWo14Oy9vGHFV9HiZ7EZ8Yf8nNYA>
also I'm sorry about the section I posted this in, what section was I suppose to post it?

@Aura

I can't extract it with it, it says the file is damaged or not formatted or something.

DpzFAsq4UEK8 - August 5, 2014, 8:38 am

SWF extracted (no 7-zip and other tools like that, just a hex editor)

thebinweevilsplayer - August 5, 2014, 9:32 am

How did you extract it and it doesn't really work for me, whenever I decompile the stuff or even go on the swf when I download it on my desktop it doesn't even load up. Can you help me out?

Help someone? ;(I have no clue what todo.

Spoiler ([Click to View](#))[img]<http://a.pomf.se/awjzfx.png>[img]

It is working for me...

I searched for the SWF file header (CWS), then copied the block containing the SWF file to a new file. (I don't know how to explain this...)

thebinweevilsplayer - August 5, 2014, 1:01 pm

Yeah I don't know what's wrong with it, but now when I try to run the swf you linked me the bot doesn't connect to the chat. So it's kinda broken. I have no idea.

DpzFAsq4UEK8 - *August 5, 2014, 1:48 pm*

Hmm, maybe SWF files ran inside a web browser cannot make cross-domain requests so the bot won't connect to xat or whatever chat site it is for...

No idea, I just extracted it ?
