Thread: [SQLi Challenge \[EASY\]](#)

Yorkiebar15 - August 5, 2014, 4:25 pm

Site:

Code `hffp://www.raa[]hauges[].com/view-news.php?id=8`

Remove 'hffp:/' & '[]'

Challenge:

Display database version/name followed by your username.

Difficulty:

EASY

Ov3rf10w - August 5, 2014, 5:34 pm

This was way too easy, thanks for the challenge ? .

D4T4B4S3 - August 5, 2014, 5:54 pm

Thanks for the challenge ? Too ezy

AURUM - August 5, 2014, 6:41 pm

Done :) thanks for the challenge. Spoiler ([Click to View](#))

explosivepastry - August 5, 2014, 7:40 pm

Thanks for the Challenge!

skeleton - August 6, 2014, 1:21 pm

Thanks for the challenge!

18772 - August 6, 2014, 5:15 pm

I couldn't find any login information .-.

IcyProtocol - August 6, 2014, 10:30 pm

Really easy, but thanks OP! ?

Astr0J3su5 - August 7, 2014, 7:37 am

Thanks for the challenge!

darkenforcers - August 7, 2014, 11:19 am

I'm confused about how to get your name in there, I didn't see anything like that in the tuts that I read.

Yorkiebar15 - August 7, 2014, 2:40 pm

(Aug 7, 2014 11:19 AM)darkenforcers Wrote: [\[CITE\]](#) I'm confused about how to get your name in there, I didn't see anything like that in the tuts that I read.

You can use hex values of the text you want to add.

Convert your text in to hex.

Throw the hex in to either group_concat, or straight in to the vulnerable column.

(Hex must start with '0x')

Example:

Text - Yorkiebar

Hex - 596f726b6965626172

Hex to use - 0x596f726b6965626172

?

AURUM - August 9, 2014, 12:01 am

(Aug 7, 2014 02:40 PM)Yorkiebar15 Wrote: [\[CITE\]](#) You can use hex values of the text you want to add.

Example:

Text - Yorkiebar

Hex - 596f726b6965626172

Hex to use - 0x596f726b6965626172

?

ummm. Why do that? I just add in my HTML in there :D Much easier and less headache. But to each their own :)

Mist-chaoshackerz - August 9, 2014, 6:39 am

Thanks for the challenge way to ezay?http://i.picresize.com/images/2014/08/09/CNb2.png

New to sql injections and first challenge done.

GameTastiks - August 15, 2014, 3:07 pm

First time sql'ing. I cant find the table! Sorry Im terrible :(

Yorkiebar15 - August 15, 2014, 3:08 pm

(Aug 15, 2014 03:07 PM)GameTastiks Wrote: [\[CITE\]](#) First time sql'ing. I cant find the table! Sorry Im terrible :(

You don't need to find the tables for the task ;)

GameTastiks - August 15, 2014, 3:14 pm

(Aug 15, 2014 03:08 PM)Yorkiebar15 Wrote: [\[CITE\]](#) You don't need to find the tables for the task ;)
?

i do not understand...

I thought you have to go into the tables and find the column that contains usernames and password? I am extremely confused

Excuse my retard. I didnt read the challenge and went a few steps too far ???

Im not sure if I was supposed to do this, but I used inspect element... Was that cheating?

[img]

Aha. It's kinda cheating. I tend to inject my name via the URL (have a look at my earlier post on page 2/3).

nickonator1 - August 15, 2014, 11:12 pm

I'm confused, your name only shows up on that web page for you? Then what's the point, or difference from using inspect element?

AURUM - August 16, 2014, 4:12 am

(Aug 15, 2014 11:12 PM)nickonator1 Wrote: [\[CITE\]](#) I'm confused, your name only shows up on that web page for you? Then what's the point, or difference from using inspect element?
I honestly have no clue. I just do inspect element personally.

Slimy - August 16, 2014, 4:47 am

I'm a newbie to SQLi so I don't know how to add my name on the end :P.

Silent.Ninja - August 16, 2014, 6:50 am

[img]http://s29.postimg.org/be50nftif/Silent_Ninja.jpg[/img]

Thanks for the challenge ?

ComputerManiac00 - August 16, 2014, 6:57 am

[img]http://s30.postimg.org/jylfoqq41/Silent_Ninja.jpg[/img]

Thanks for the challenge ?

sqli2021 - August 16, 2014, 7:12 am

gotta use html code and convert it to hex to have it show your name slimy. is a tut that was made not too long ago here in the sqli part of hf.

Yorkiebar15 - August 16, 2014, 9:31 am

(Aug 15, 2014 11:12 PM)nickonator1 Wrote: [\[CITE\]](#) I'm confused, your name only shows up on that web page for you? Then what's the point, or difference from using inspect element?

There's not really any difference, but the challenge is all about injection, so you might as well inject your name instead of inspecting elements which can be done on any site.

(Aug 16, 2014 04:12 AM)sp4ceRH1N0 Wrote: [\[CITE\]](#) I honestly have no clue. I just do inspect element personally.

(Aug 16, 2014 04:47 AM)Slimy Wrote: [\[CITE\]](#) I'm a newbie to SQLi so I don't know how to add my name on the end :P.

Thanks for taking part, and congrats on completing the challenge.

To All:

I wrote a full SQLi tutorial, towards the end I explain about adding hex (your username) to the page.

<https://hackforums.net/showthread.php?tid=4398707>

Aur3xis - August 16, 2014, 12:30 pm

No idea how to include my name to that :(started sqli today!

Yorkiebar15 - August 16, 2014, 2:31 pm

OMG 35 characters.

sesh - August 17, 2014, 7:50 am

First time attempting something like this

Thanks for the challenge OP.

smashkids - August 20, 2014, 5:26 am

Yesterday was the first time I ever read about SQLi and after reading 3 tutorials.. Did that challenge.
?[img]http://store.picbg.net/pubpic/6D/84/4f6037f63dfc6d84.PNG[/img]
BTW how to inject a colored string? I cant find any "colored text to hex converter" or something like that.. As I said Im newbie to those kind of things.

Yorkiebar15 - August 20, 2014, 5:30 am

(Aug 20, 2014 05:26 AM)smashkids Wrote: [\[CITE\]](#) Yesterday was the first time I ever read about SQLi and after reading 3 tutorials.. Did that challenge.

Congrats on project completion. You simply convert the text with coloured HTML formatting to hex, example;

Code Yorkiebar

smashkids - August 20, 2014, 5:37 am

Im a bit stupid and I dumped database instead of version. Here you go ->

[img]http://store.picbg.net/pubpic/75/5E/2d3856c5ed84755e.PNG[/img]

Yorkiebar15, thanks for your tutorials and help about the color code.. ? I was never going to try to convert a html code to hex and put it in there ???

Edited: Added a new image with colored text and a picture.

bruce2014 - August 20, 2014, 6:12 am

LOLOLOLOL SO EASY LOLOLOL

Yorkiebar15 - August 20, 2014, 6:13 am

woahxx - December 29, 2014, 3:40 pm

You have an error in your SQL syntax; check the manual that corresponds to your MariaDB server version for the right syntax to use near "" at line 1 - 2 easy.

JTAW - December 30, 2014, 10:41 am

I think this was a little too easy, I've only been learning sql injection for a day and even I could do this in the first hour... Thanks for the 'challenge' I guess.

SIM-2251019 - December 30, 2014, 1:28 pm

Too easy.

Maxiim - December 30, 2014, 2:29 pm

Actually completed this, cba posting proof but thanks for the challenge :) (first time testing SQL injection)

For some reason I tried to find passwords and users, until I read some responses ITT :/

DEARYOZ - December 30, 2014, 7:42 pm

New to the forum so can't post the image of my proof but I might update it whenever I get 50 posts or get upgrade it, if I ever remember this :)

But thank you for the challenge. ?
