Thread: [Cannot find drivers/software for my mouse :S](#)

+Reckless - August 5, 2014, 4:39 pm

My mouse is made by the company: a4tech

I have no idea of the model or anything but want the driver software.

Here is a picture: <https://puu.sh/aGm3j/0c6b6b215d.jpg>

Any ideas?

I'm guessing you're expecting it to come with a program that lets you keybind/macro. Some games let you bind mouse/keyboard keys. And just download a macro program from the internet, this mouse might not come with one.
