If you have any questions comment here.

1. Create a facebook group

<https://www.facebook.com/browsegroups/?category=membership>

2. When you are in the group -> click add file -> select a gif -> when testing uploaded the gif using a jpg extension. Also fair warning keep the gif size small otherwise it will be resized by facebook.

3. Copy the download url

4.

a. Now you go to your profile

b. Create a new note -> <https://www.facebook.com/notes>

c. on the note put the img url you just obtained from the group you created

Code d. save the note

e. Replace facebooknoteurl. With the url of the note you just created.

Code

https://www.facebook.com/dialog/share?app_id=145634995501895&display=popup&href=yourfacebooknoteurl&locale=en_us&next=https://www.facebook.com/

Now go check your profile. The gif should be loaded.

Example

Code <https://www.facebook.com/100004111069452/activity/375957012551331>

Did you atleast get the gif on the wall perfectly.

I noticed if you hide the note you created on your profile, the gif breaks.

And yes it still works.
