Note -

- 1) This is my Fifth Theme... written while learning so it may have bugs...

- 2) Theme is coded without Themebase...
- 3) Constructive Criticism & Suggestions are always welcome...
- 4) Please leave comments for encouragement... ;)
- 5) Will add more controls if you find it useful & need arises... ;)
- 6) Credits to "Aeonhack" for Roundrect function...
- 7) Credits to Mephobia for InnerGlow Function...

I don't want to bash but work on the colors mate. Anyway, it's nice to see new themes, keep doing :)

Nice theme. Agree with above though, try a different colour scheme.

Thanks for the feedback... Actually tried gradient with gray colour ;)

Definitely needs a different colour scheme. Also the back border on the controls makes everything look very LQ.

Keep it up though, I'm sure you'll be able to improve it a lot.

It's a good start, maybe add some other colours in it.

its good, but the color selection, just change that up a bit and it will look a whole lot better

Reminds me with VB6 form skins .

Will keep this in mind... Thanks for your feedback ;)

Design looks awful imo, the color scheme isn't very attractive and you can probably do better. This doesn't look very different as your other theme btw, just a recolor.

Ironical, "Glow Theme", Yet its Dull, But I Still like it!

?Legendz - August 27, 2014, 4:29 pm

That theme looks awesome man! Good work!

The Windows API will always triumph over themes like this. Sleekness does not require fancy graphic buttons.
