This is the greatest Skye resolver in the History of Skye resolvers.

Mister Spiderman - September 2, 2014, 7:44 pm

Both sites are offline still on my end. Hantzresolver is saying tool is down, and this site its saying website is offline.

CobraCode - September 2, 2014, 11:31 pm

I've re-booted my server as we recieved a large DDoS attack last night. Working with CloudFlare to resolve this.

You will get an answer if you ask the owner on skype, his skype is cobra.hf

jFly - September 27, 2014, 9:13 am

I love this resolver it is greaty ty !!!!

ProfinMC - October 13, 2014, 4:34 am

That was a good resolver, but it was ddosing almost everyday.

Today it's slow :(

BigDap - October 14, 2014, 1:54 pm

Not only has the owner, fhotog (Cobra), changed all the keys so people would have to re-buy but he has also removed a-lot of the functions from the API system itself to where it is much slower, trying to compensate for all the use.

This, imo, is a dying project from lack of monitization.

I do believe his stub has either:

- 1: died
- 2: failed payment
- 3: updated the patched skype and stub has not been updated to resolve

every username I use there fails.

Error: Cannot resolve this Skype username

I use this all time, i also have api from here no keys were changed ??

CheckFallen - November 12, 2014, 5:03 am

This is one of the best resolver's out right now. Easily one of the most reliable.

BigDap - November 18, 2014, 12:54 pm

Project "resolver.in" has been transferred via domain name changes to redirect to "betaresolver.fr" - the domain, which is quite worthless by reputation from fhotoG/cobra, is for sale - so i hear.
